

## Market Survey:

# How LUCRATIVE Is The IoT MARKET In India

**Sudeshna Das** is senior executive editor at EFY

In the last couple of years, instead of exports and manufacturing, India's growth story has been more dependent on the services industry, domestic consumption and the rise of small and medium enterprises and startups.

Considering these trends and the strong push from the government for Digital India, the market for emerging technologies like Internet of Thing (IoT)-related components, products and solutions is bound to grow significantly. This, in turn, may represent a significant growth opportunity for organisations offering such related components, products and solutions.

Senior executives from such organisations were surveyed as part of our monthly industry poll. In this article, we take the pulse of the IoT market in India.

## Growing market

The global IoT market will exceed US\$ 300 billion by 2020. According to a NASSCOM study, the Indian IoT market is poised to

## Methodology

For the survey, ten senior professionals involved in the Indian IoT industry ecosystem were randomly selected to share their inputs. This sample is a microcosmic representation of India's IoT industry. Survey participants were requested to share their insights on the following:

- Anticipated growth of the Indian IoT industry in FY 2017-18
- Expected growth per cent
- Major demand-generating applications
- Customer categorisation
- Hindrances that impact growth of this sector
- Technology trends in this sector

Responses obtained from the interviews were then collated and analysed.

reach US\$ 15 billion by that year, accounting for five per cent of the global market (Fig. 1).

India's IoT market is expected to grow exponentially over the next couple of years. According to 6Wresearch, the Indian IoT market is projected to grow at a CAGR of 28.2 per cent during the years 2016-22. Key drivers of
