Number of speakers: **150+**

Number of major buyers invited to Buyer-Seller Meet: **11**

What sets India Electronics Week (IEW), organised by the EFY Group, apart from other technology shows? Through this brief report we attempt to share key highlights of what transpired at IEW 2017, with the hope that it will motivate you to experience the show first hand next year, rather than read about it here.

The theme for IEW 2017 was 'Invest In India', which is in line with Central government's 'Make In India' initiative. The latest avatar of this annual event comprised a large exhibition of electronic products, 11 conferences addressed by 150+ speakers and attended by 3000

delegates from India and abroad, and 20+ workshops for those who wanted to update their tech knowledge.

IEW recognises the remarkable achievements of India's electronics industry and showcases its capabilities to the world. This year it provided an excellent platform for those in the electronics industry who wanted to network and interact with each other in order to grow their businesses.

Networking Platforms At IEW 2017

Inaugural session at the CEO Summit

CEO Summit

CEO Summit on the theme 'The Roadmap For Enhancing Value Addition In Electronics Manufacturing' was put together with the help of ELCINA—India's leading trade association representing the electronics industry. The chief guest at the summit was Sunil Kumar Barnwal, IAS (secretary to the chief minister; secretary, information technology and e-governance; as well as secretary, industries, mines and geology, Jharkhand). Other eminent guests included S.K. Marwaha, senior director, MeitY, and Deepthi Ravula, joint director - electronics and
