of forecast (2020-21), IDC expects AR headsets to experience exponential growth as these capture a quarter of the market by the end of the forecast.

Said Jitesh Ubrani, senior research analyst for IDC Mobile Device Trackers, "AR headsets are on track to account for over US\$ 30 billion in revenues by 2021, almost double that of VR, as most of the AR headsets will carry much higher average selling price with earlier adopters being the commercial segment. Meanwhile, most consumers will experience AR on mobile devices, although it's only a matter of time before Apple's ARKit- and Google's ARCore-enabled apps make their way into consumer grade headsets."

While AR headsets are poised for long-term growth along with a profound impact on the way businesses and consumers compute, VR headsets will drive a near-term shift in computing. Recent price reductions across all the major platforms, plus new entrants appearing in the next month, should drive growth in the second half of 2017.

GST relief for exporters

In a major relief to small exporters, the Indian government has allowed them to supply items on the basis of a letter of undertaking (LUT) without furnishing a bond and a bank guarantee. However, the LUT facility will not be available for those who have been prosecuted under the existing law for evading taxes above ₹ 25 million.

This would improve the cash flow for exporters who are struggling to get refunds under GST due to delay in filing invoice-level returns. Since the GST rollout, the exporters needed to submit a bond to be able to avoid the levy of integrated GST on items of export. In the pre-GST regime, exporters received upfront exemption on pay-
