

Wipro Digital to acquire Cooper

Wipro Digital has signed an agreement to acquire Cooper, a design and business strategy consultancy. Wipro Digital is the digital business unit of Wipro Limited. Cooper will become part of Designit, Wipro Digital's strategic design arm, further strengthening its design and innovation capabilities, expanding its reach in North America and adding capabilities in professional design education.

ing domestic taxes, but the mechanism changed to provide refunds on taxes paid instead of exemptions under GST.

Analog Devices launches design fellowship programme

Analog Devices, Inc. has announced the start of its *Anveshan 2018* design fellowship programme. Anveshan provides a comprehensive platform for students to create innovative solutions using Internet of Things (IoT) technologies, sensors, Cloud, data analytics and more. With it, students can design and architect a complete product, core technology, algorithm or service in a low-risk setting with funding and guidance provided by Analog Devices.

This year, the programme is focused on Make for India with a goal of challenging students to build smart and innovative solutions for problems in healthcare, agriculture, smart city, industry 4.0 and smart lifestyle.

TUV Rheinland expands in India

TUV Rheinland India, a subsidiary of the TUV Rheinland Group, Germany, has expanded its footprint in India with a new 2.5 million Euro facility located at Electronic City in Bengaluru.

The purpose-built 14,000sq.m facility makes TUV Rheinland India the first international testing, training, inspection, consulting and certification organisation operating in the country to house all of its

Awards

The Hi-Tech Robotic wins 'Most Innovative Company' Award

The Hi-Tech Robotic Systemz (HRS), a robotics and artificial intelligence company, has been conferred with the 'Most Innovative Company' Award at CII Industrial Innovation Awards 2017 held in New Delhi.

The company was recognised for its consistent innovative solutions in autonomous driving, driver assistive and mobile robots product line for the industry. This year India is ranked 60th in the Global Innovation Index, which is the highest for the country so far.

Speaking on this occasion, Anuj Kapuria, founder and CEO of the company said, "We are committed to offer effective solutions, deliver scalable, smart autonomous and assistive systems to our existing and potential stakeholders through disruptive business models. We aim to unlock the industry potential through differentiated thinking and advanced technological innovations."

state-of-the-art laboratories under a single roof. It offers customers a complete solution that will reduce turnaround time and accelerate time-to-market.

The laboratories include the photovoltaic lab, material testing lab, electrical safety lab, medical lab, battery testing lab and soft-lines testing lab. It is also home to the wireless IoT testing laboratory, which conducts radiated and conducted signal measurements as well as wireless alliance certification.

element14 opens new office in Bengaluru

Electronic components distributor element14 has opened a new office in Bengaluru that houses members of element14's customer facing teams, as well as global Centres of Excellence in e-commerce, technology and business intelligence.

Ravi Pagar, regional director-South Asia, element14 Asia-Pacific, said, "The new office will establish more Centres of Excellence in India,

thus enabling faster and closer in-region support to our customers. This also means faster turnaround for technical queries and even face-to-face meetings with the technology experts at element14."

PCB Power launches portal

PCB Power, a supplier of printed circuit boards (PCBs), has launched a portal that provides customers services ranging from PCB layouts and components to PCBs and PCB assemblies.

Khushal Panchal, vice president, said, "It is indeed a marketplace where customers come and pick any service/product under one umbrella, conveniently." He added, "PCB Power Market is poised to be a total solution provider to R&D engineers, students, hobbyists, electronics professionals and startups. We are also pleased to inform that we have started a brand new state-of-the-art fully automatic PCB assembly plant with X-ray and global quality standards."
