

HARBINGER SEMICONDUCTORS PVT LTD, established in 2017 by a team of Technocrats, is an end to end solution Provider backed with designing, sourcing, assembly & box build capabilities.

CSR1010 Based on Bluetooth Module

This BLE is a Bluetooth smart module based on Bluetooth V4.1 Specification. It can be used in various IOT applications that require low power wireless data transfer.

Features:

- Based on CSR1010 from Qualcomm
- 24x24mm size.
- Supports ATT, GATT, SMP, L2CAP and GAP profiles.
- Has GPIOs, Analog IOs and supports I2C, UART and SPI.
- Has on-board printed antenna.

T.O.T & Design
Partners are welcome

Harbinger has ready solution for these application.

- Wrist band : This Wearable device can track the calories burned by the user.
- BLE Tag, Beacon.
- Smart Plug: ON/OFF using smart Phone.
- Smart Street Light with Mesh.
- Home Automation Gateway.
- Wireless Battery management system that measures VRLA batteries and sends data over Rs-485 using Modbus RTU.
- 8 Lead wearable ECG system.
- LED street lights 3W,7W,15W,20W,36W and 70W.
- Power supply for Telecom.
- Remote Monitoring system for telecom tower monitoring.
