Precision Gaming Mouse

Ideal for hours of practice and tournament gaming

HyperX, a division of Kingston Technology, has launched Pulsefire FPS gaming mouse in India. Featuring PixArt 3310 sensor for accurate tracking, Omron switches for fast response times, and 20M click reliability per switch, this gaming mouse meets the needs of professional and aspiring FPS gamers alike.

For serious players, Pulsefire FPS is built with an ergonomic and light-weight design for either palm-grip or claw-grip action. Pulsefire FPS also provides four presets from 400 to 3200dpi, all available at the touch of a button. Optimal weight distribution and light weight of 95gm allow rapid movements. Non-slip side grips help secure the mouse firmly in your hand. Omron switches and six durable, ultra-responsive buttons give crisp, tactile feedback on every click. The mouse also includes a flexible braided cable and large mouse skates for smooth glide.

4G Smartphone

India's lowest priced

Micromax has launched a 4G smartphone 'Bharat2 Ultra' with Vodafone SuperNet 4G connection for just ₹ 999 (conditions apply). The phone brings better camera, battery and display options for new smartphone users in the most affordable category.

Bharat-2 Ultra features an aesthetic design, powered by Spreadtrum SC9832 1.3GHz quad-core processor with 512MB RAM and 4GB ROM. It has a 10cm (4-inch) WVGA display and 2MP rear camera with 0.3MP front camera. The handset also comes with different camera modes like scene, frame and burst. It runs on Android Marshmallow with 1300mAh battery and supports full video viewing,

social networking and chat apps to give a complete smartphone experience to users.

5.1-Channel Multimedia Speakers

With glossy panel and attractive design

Zebronic's newest 5.1-channel multimedia speaker system (comprising five satellite speakers and the base) is compact and easy to operate. At the core of ZEB-SW6760RUCF is a thumping bass effect with 60W RMS power output. The system scores high in looks with glossy panel and attractive design. Its other features include bright LED display; user-friendly remote control; easy connectivity to PC, MP3 player and TV set; and USB device and SD card slot. With built-in FM and advanced music options, the system redefines your music experience.

'Pay with Google' on Android devices

Android mobile device users can now 'Pay with Google' to speed up online checkouts. Normally, users have to fill up multiple forms for different sites when paying for services. But now they can simply choose any of the credit or debit cards added to their Google Account through Google Play, YouTube, Chrome or Android Pay. Google sends the service user's payment information and shipping address with the information from their account, meaning there is no need to type it in.

Share your location on WhatsApp

WhatsApp users can now share their location with other contacts using end-to-end encryption. They can share their location on a per chat basis and for a limited amount of time. They can also stop sharing at any point. To use the new feature, users need to tap on the attach button, then choose 'Share Live Location' option under 'Location.' This feature is coming to both iOS and Android.

macOS High Sierra now available as a free update

Apple has announced that its macOS High Sierra desktop operating system is now available as a free update. With macOS High Sierra, Mac users get powerful new core storage, video and graphics technologies. A new file system ensures more efficient and reliable storage, while support for High-Efficiency Video Coding (HEVC) brings stunning 4K video at lower file sizes.

Metal 2 powers virtual reality content creation, faster performance and more. The Core ML developer framework makes it easy to create apps with powerful machine learning that predict, learn and become more intelligent.

AMD announces new GPU

AMD has launched a Polaris architecture-based discrete graphics processing unit (GPU) in multi-chip module (MCM) format with integrated memory for smaller, power-efficient custom designs, as well as PCI Express and MXM formats for standard form factor systems. The AMD Embedded Radeon E9170 Series GPU is ideal for devices that require premium graphics and expanded display capabilities while meeting exacting power and thermal efficiency demands.
