

DO-IT-YOURSELF

Get your input devices in place.

If you have a Bluetooth mouse and a Bluetooth keyboard, connect them to your smartphone via Bluetooth. If you prefer cabled connection, or if you have USB-driven keyboard and mouse, you will need a USB OTG hub to connect these to the smartphone. The flip side of using an OTG cable is that you will not be able to charge your smartphone as long as the cable is in use, since it connects to the charging point of the phone. Once connected, the mouse takes over control of the interface.

Disable your touch keys from popping up. Now that you also have a physical keyboard, you don't need the keypad on the touchscreen. Turn off the keypad application in your phone. Else, download Null Keyboard mobile application and configure it. This app will prevent your virtual keypad from popping up. If you want to use your touchpad at

Fig. 4: Cast on monitor

any time, go back to Null Keyboard application and turn off the property to re-enable the touchpad.

Setting up the display. You need a display monitor (or a TV) and a screen casting device to replicate your smartphone screen on the monitor. Here, we explain with Google Chromecast; another popular alternative is Miracast. Connect Chromecast to your screen moni-

tor and connect it to the same Wi-Fi network as your smartphone. You can create the connection using the smartphone.

If you do not have a casting device, connect an MHL cable to your smartphone. Connect the MHL, in turn, to an HDMI cable, which bridges the smartphone to the monitor or TV.

Usage

After setup, download your smartphone desired applications and start using it just like a computer. However, keep in mind that your smartphone cannot match the strength of an actual computer. Also, Sentic Desktop cannot equal an authentic Windows or Mac OS. This setup is a cost-effective temporary alternative when your computer is not available or it's not working. **EFY**

KORE
Total LED Lighting Solutions

KEY OPERATION & ELECTROCOMPONENTS PVT. LTD.
AN ISO 9001:2008 CERTIFIED COMPANY

LED Flood Light Fixtures
10W/20W/50W/
