LED FILAMENT BULBS Awaiting Their Brand Messiah

► A million dollar business opportunity to be explored as the demand for LED filament bulbs continues to rise

In 'Unplugged Courtyard' dining restaurant they entice us as stars, in 'Sevilla' they bring out the vintage charm, and in 'Too Indian' the central chandelier is one of their best avatars. LED filament bulbs are enhancing the aesthetic appeal of restaurants, salons and other retail spaces. These add glamour to interiors of almost all visually appealing restaurants.

The irony, however, is that, there is no major brand offering these bulbs in the market. "There is immense scope of building a brand in the segment. The market

size of LED filament bulbs will be about 600 million units by 2018, according to Epistar market analysis report. The current trend towards usage of energy-efficient alternatives has led to the increase in demand for these famous exposed-filament Edison bulbs, mainly in retail spaces because of their aesthetic appeal," explains Amarendra Srivastava, business analyst and coach.

"The expected profit margins promise a high return on investment (ROI). Currently, if one goes by the sourcing and marketing model of brand building, average cost of

sourcing is about ₹ 7000 for 100 LED filament bulbs. Cost varies with design. One may add about 30 per cent other expenses to the same. On an average, an LED filament bulb costs about ₹ 300 in the Indian market. So the scope is huge," Srivastava adds.

Does the brand matter?

"Locally available bulbs are often faulty, and need replacement almost every month. We don't have a choice currently. If I had one, I would love to invest in a good homegrown brand for the same," shared Varun Puri, owner, Too
