

Startups now a part of FDI policy

Indian government has unveiled a new foreign direct investment (FDI) policy framework that lists startups as a separate section. The framework spells out provisions that allow startups to raise foreign money from venture capital funds and other investors through instruments such as convertible notes. Startups can issue equity or equity-linked instruments to foreign venture.

Mentor India campaign gets fantastic response

The premier think-tank of the government of India, NITI Aayog, has received a 'fantastic response' with over 5000 applications for the Mentor India Campaign—informed Ramanathan Ramanan, mission director, Atal Innovation Mission (AIM), recently at an ASSOCHAM event. Ramanan also said, "We are going to build a network of mentors across the country from every professional organisation which is capable of supporting, and this is going to be one of the largest mentoring networks across the country."

DigitalOcean to 'elevate' Karnataka startups

DigitalOcean, the cloud for developers, will provide cloud infrastructure and support to startups enrolled with the Karnataka Start-up Cell. The MoU was signed at the government's 'Elevate 100' programme, which aims to support startups by providing a sum of ₹ 4 billion of government funds over a period.

SEMBORP becomes owner of renewable energy business SGI

Sembcorp Utilities has acquired IDFC's remaining stake in Sembcorp Green Infra (SGI), for ₹ 14,102 billion. With this, Sembcorp has become the sole owner of SGI—one of the largest renewable energy players in India. SGI is present across seven states in India.

NXP India provides safety device to its female employees

As part of its commitment to ensure security and safety for its women employees, NXP India has provided a safety wearable device called 'SAFER' to its female employees. The pendant was handed over to 90 women employees, who usually work late after 7 pm for various critical projects. The aim of this initiative is to ensure women feel safe at work and on their way home.

Infineon invests in fabless semiconductor company XMOS

Infineon has invested in Bristol-based fabless semiconductor company XMOS that provides voice processors for IoT devices. "Through this investment, Infineon will further explore the high potential of voice control and is well positioned to address future use cases like speaker authentication or contextual awareness," said Andreas Urschitz, president of the Power Management & Multimarket Division at Infineon.

The acquisitions were made through Tessolve, a Hero Electronix Venture and a leading provider of engineering services. With these two acquisitions, and the addition of TES Europe's India embedded systems business in 2016, Tessolve is now strongly positioned as a leading end-to-end semiconductor engineering solutions provider—from chip design, test and PCB engineering through embedded systems development.

Reliance's UNLIMIT and IBM Internet of Things collaborate

UNLIMIT, a business venture of Reliance Group, and IBM have announced a strategic collaboration that brings together UNLIMIT's industry-specific Internet of Things (IoT) solutions with IBM IoT capabilities to unlock new value for businesses in India.

IBM and UNLIMIT will co-create IoT solutions for specific industry verticals including automotive, insurance, utilities and industrial automation. They are also developing IoT solutions for implementation across Reliance Group companies.

Siemens and HP partner to advance 3D printing

Hewlett Packard (HP) and Siemens are accelerating 3D printing for industrial production through an HP-certified Additive Manufacturing (AM) software module from Siemens.

The new software module, Siemens NX AM for HP Multi Jet Fusion, is now available from Siemens PLM Software as an extension to Siemens' end-to-end design-to-production solution for additive manufacturing. It will allow customers to develop and manage parts in a single software environment for their HP 3D printing projects, avoid costly and time-consuming data conversions and third-party tools, and improve their overall design-to-finished-part workflow efficiency.

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Name, Date and Venue	Topics	Contact address for details
Embedded World 2018 February 27-March 1, 2018 Exhibition Centre, Nuremberg, Germany	Trade fair for IT security for electronic systems	NürnbergMesse Website: www.embedded-world.de/en
26th Convergence India 2018 March 7-9, 2018 Pragati Maidan, New Delhi	International exhibition and conference on digital convergence	Website: www.convergenceindia.org
ELECRAMA March 10-14, 2018 India Expo Mart, Greater Noida, Uttar Pradesh	Flagship showcase of the Indian electrical industry ecosystem and the largest congregation of power sector ecosystem in the geography; brings together the complete spectrum of solutions that powers the planet	IEEMA Website: http://elecrama.com , http://ieema.org
SEMICON Taiwan, 2018 Taipei, Taiwan Sep. 12-14, 2018	Premier event in Taiwan for microelectronics manufacturing	Website: www.semicontaiwan.org/en

Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.
