Portable Bluetooth Speakers

Capable of uninterrupted playback for up to 8 hours

Digitek has launched two premium Bluetooth speakers for audiophiles and music enthusiasts. A perfect blend of style and functionality, 6W DBS004 and 12W DBS005 make an ideal companion for sports activities, camping or pool parties.

Super-portable, trendy and waterproof, the palm-sized DBS004 speaker is IPX5-enabled, which means it is water-resistant. Its built-in 600mAh Li-ion battery plays uninterrupted music for 3-8 hours with just 2-3 hours of charging. Built-in microphone supports hands-free call for 4-5 hours at a stretch and supports Bluetooth, AUX IN, TF card as well as FM radio.

DBS005 packs big sound into an ultra-compact design and can easily connect with your smartphone, iPad, MP3/MP4 player or laptop. Other than TF card and FM radio, it also supports LINE IN and USB. Its built-in Li-ion rechargeable battery of 1500mAh promises playtime of 6-8 hours and call time of 4-5 hours.

Both the speakers support Bluetooth 4.2 + EDR, which has a range of up to 10 metres.

4G Smartphone

Loaded with powerful performance at an affordable price

Mafe Mobile has launched a value-for-money 4G smartphone, called AIR. The phone has a 10.2cm (4-inch) FWVGA (800x480-pixel) display, which offers a rich movie viewing and game play experience. Powered by a 1.3GHz quad-core Spreadtrum processor, 2GB RAM and latest Android 7.0 Nougat OS, AIR makes multi-tasking a breeze. You can watch movies, chat and play games without draining the device performance!

Featuring a 5MP rear camera with LED flash and a 2MP front camera, AIR is equipped with a 2000mAh Li-ion battery with 10 hours of talk time and 22 hours of standby time. Internal memory storage is 16GB, which is expandable up to 32GB. Other useful features include GPS, Bluetooth, Wi-Fi, Wi-Fi hotspot, gravity and proximity sensor, and FM radio.

Selfie Camera Phone

With Full View display

Redefine the selfie experience with the revolutionary 24MP HD selfie camera of Vivo V7+ smartphone. An advanced Bokeh mode lets you blur the background with sharper contrast and visual appeal of the subject. The phone also renders an all-new gaming experience with its 18:9 Full View display. Further, the exclusive pure game mode allows users to play uninterrupted by cancelling incoming calls and messages.

V7+ is said to be the first Snapdragon SDM450 phone to launch in India. It runs on Funtouch OS 3.2 based on Android 7.1. Powered by 4GB RAM and 64GB ROM, which is expandable up to 256GB, it allows smooth multitasking and easy operation. Exciting features for new-age customers include phone unlocking by facial recognition, smart screen split, eye protection mode and app clone (two separate user accounts to log into various applications).

GizMo ByTes

Access incompatible files on Android TV-supported devices

If you download video content to play from external storage on Android TV and want something easy to use, then Paragon USB Android app is right for you. This app allows you to conveniently transfer files between Android devices and Windows or Mac-formatted (exFAT, NTFS, FAT32 or HFS+) USB flash drives. So you can watch HD and 4K video files from any USB storage device using Windows or macOS file system formats directly on your Android TV devices.

Recreate scenes with video editing mobile app

Magic video maker and editor LIKE has launched a new magic effect that enables users to re-create stunt scenes in *Iron Man* without any cost. The developers named this amazing effect as 'LIKE Rocket'. Users only need to record a normal video and add effects via LIKE, and then magic scenes like flying in the air just like in *Iron Man* can be easily realised. With special effects such as LIKE Rocket, Ant Man and many more, anyone gets the 'power' to fly up and down in their video. The app allows creative talents to create even more stunning scenes than the movies within a few minutes. It is available on Google Play and iOS app stores.

Google payment app for India

Search engine giant Google has launched a new digital payment app called Google Tez for the Indian market. In addition to English, the app supports seven Indian languages, and is available for both Android and iOS platforms. Google Tez links to a user's bank account, like Apple Pay and Android Pay, and lets users transfer money, receive payments and pay for purchases.

The most powerful chip for smartphones launched

Apple claims its A11 Bionic 64-bit, 6-core processor to be the "most powerful and smartest chip ever in a smartphone." The chip features 4.3 billion transistors and its two performance cores are 25 per cent faster than the A10 chip, while the four high-efficiency cores are 70 per cent faster than A10. It also includes Apple's second-generation performance controller, which handles multitask workloads 70 per cent faster than the current controller. The A11 Bionic powers the new iPhone 8 and iPhone X.
