

CREATED TO TAKE THE HEAT

DOW CORNING

Thermal Management Solutions

Our proven silicone materials can ensure stability in extreme temperatures and harsh environments, meet your goals for heat dissipation, simplify processing, and help drive cost of ownership lower.

We can help you remove the heat — while leaving in reliability and performance. We have one of the industry's broadest portfolios of thermally conductive adhesives, compounds, encapsulants and elastomers.

Some of our latest innovations include:

- New thermally conductive gap fillers for advanced printed circuit board module assembly
- Thermal Radical Cure™ silicone adhesive technology with a revolutionary "inside-out" cure
- Quick in Connect (QiC) adhesive that delivers instant adhesion (or green strength)
