

Configurable Intelligent High Power System

Designed for a wide range of medical and industrial applications, Artesyn's iHP configurable intelligent power system provides accuracy, resolution and stability as either a programmable voltage or current source. It provides up to 24 kW in 3 kW increments and can be configured for up to eight (8) outputs using a wide variety of plug-in modules that address a large range of voltages and currents.

The iHP power system offers developers either an analog or digital interface to their system supporting standard communications protocols, while a software graphical user interface (GUI) allows for easy configuration.

- Up to 24 kW
- 0 to 1000 V
- Up to 1600 A
- Up to eight (8) outputs
- Versatile input range from 180 to 528 Vac single- or three-phase
- Applicable to all high power applications
- User configurable input
- Programmable load optimization via GUI
- Active PFC typically >0.9 with full medical approval
- High efficiency (92% typical)
