

EFY Magazine Attractions During 2017

MONTH	TECHNOLOGY FOCUS	ELECTRONICS DESIGN	MARKET SURVEYS
January	Computer Vision	Lowering Power Consumption	Electronic Component Manufacturing
February	Smart Fabrics	Improving Wireless Signal Performance	Electronics Manufacturing Services
March	Exciting Technologies Powering the IoT	Building More Reliable Printed Circuit Boards	Industry Outlook for 2017-18
April	Virtual and Augmented Reality	Developer Boards: DIY and Hobbyist Applications	Printed Circuit Boards
May	Smart Robotics	Fight of the Processors: Ultra-Low-Voltage Computing (Mobile and Portable Devices)	The Internet of Things
June	Artificial Intelligence	How to Get the Best Design for Manufacturing	Strategic Electronics
July	5G and Beyond	Developer Boards: Industrial Applications	Mobile Handset and Telecom Device Manufacturing
August	3D Printing	Improving Thermal Dissipation	LED Lighting
September	Industrial IoT	Which Input Technologies Should You Use	Solar
October	The Brains of Mobile Devices	Ruggedising Hardware	Electronics Manufacturing Equipment (Both SMT and Non-SMT Categories)
November	Security of the IoT	Fight of the Processors: High-Performance Computing	Test and Measurement
December	Implantable and Edible Electronics	Which Output Technologies Should You Use	Materials and Chemicals

Want to Increase Sales? Need a Better Salesman?

Explore – **Electronics Industry Directory**

Reason:

- Over 1,60,000 buyers to Uplift your Sales
- Key Category presence during Buying Search
- Industry Report to make informed decision(s)
- Enhancing your presence and reach
- Networking and Imagery to help grow your market reach
- Building Industry Key Decision Maker(s) connect
- Increased Sales penetration
- Managing Macro Marketing to Micro Marketing
