

A TOTAL SOLUTION COMPANY FOR YOUR PCB REQUIREMENTS

TTM Technologies, Inc. is one of the world's largest printed circuit board (PCB) manufacturers, focusing on technologically advanced PCB, backplane assemblies and electro-mechanical solutions (E-M Solutions).

Highlights:

- 25 facilities worldwide with over 30,000 employees
- Publicly traded US Company and listed on the NASDAQ (TTMI)
- Serve diverse end markets including Defense, Aerospace, Cellular phone, Computing, Industrial & Instrumentation, Medical, Automotive, Networking & Communications
- Technology focus including 55 awarded patents with 28 patents pending for advancements in manufacturing and design
- Quick turn prototype development through final volume production

PCB manufacturing capabilities

- Rigid PCBs, Flexible PCBs & Rigid-Flex PCBs
- Multilayer up to 60+ layers
- HDI Technology
- IC substrates
- RF & Microwave PCBs
- Thermal management solutions including via farms, press fit coin, e-coin, heatsinks, metal in-lay and adhesive attach technologies
- FLAT-WRAP™ Technology
- Wide range of laminate options including high temperature, low loss and lead-free laminates
- Mixed dielectric (hybrid) constructions
- Large panel size up to 30"x 55"
- Embedded coin, or metal core and metal backed MLB
- Panel thickness up to 0.450"
- Heavy copper (10 oz. outer layer/ 5 oz. inner layer)
- Embedded, distributed and discrete passive components
- Assembly & System integration

Certifications:

MIL-PRF-31032

AS9100C

ITAR

IPC 6012

IPC 6018

NADCAP

ISO
