

Protection against counterfeit with OPTIGA™ Trust B

Authentication solution for improved security and reduced system costs

OPTIGA™ Trust B is a turnkey security solution designed to help system and device manufacturers safeguard the authenticity, integrity and safety of their original products.

Benefits:

- › Lower system costs due to single-chip solution
- › Increased security with asymmetric cryptography and chip-individual keys
- › Easy integration thanks to full turnkey design

Target Applications:

- › Battery authentication
- › IoT edge devices
- › Consumer accessories
- › IP & PCB design protection
- › Original replacement parts
- › Medical & diagnostic equipment
