

Outsourcing Design And Manufacture? Here's What Can Help

There are several phases in the design and manufacture of a product, all of which are important, as outlined here. But to start with, if you are looking to outsource design and manufacture, please provide all the specs you desire in the product right in the beginning

Mukul Yudhveer Singh

There is probably no electronics brand that has not thought of outsourcing designing or manufacturing, even both, to an independent partner. And why not, the advantages of the same range from less expenditure on R&D, hiring professionals and many other processes, but many a times, the fear of not being able to get the desired product outweighs these benefits.

If the fear were true, tech giant Apple

would have never outsourced manufacturing of its world-famous iPhones to third parties. As a matter of fact, the company is now investing heavily in India, after China, where Apple's contract manufacturers include the likes of Foxconn, Wistron, and Pegatron. They have announced to put in close to US\$900 million in India in the coming years!

It's an inclusive art

There are companies that quickly want a reference design, get it manufactured and
