capacity of two million units a year in phase 1 and will serve as the company's global manufacturing hub for its range of electric-powered scooters and other two-wheelers across India and international markets including Europe, the UK, Latin America, Asia Pacific, Australia, and New Zealand.

Apple ramps up manufacturing operations in India

Apple has started the assembly of its latest smartphone iPhone 12 in India. It is, however, not yet clear which of Apple's contract manufacturers is assembling these latest iPhone models in the country, though a report by Reuters states that it is Foxconn that is responsible for doing the same. India is said to be the second largest smartphone market in the world. Apple's best quarter performance in the country came during Q4 2020. More and more companies are moving away from China.

Huawei bags Airtel contract

Bharti Airtel has awarded China's Huawei with a procurement order worth ₹3 billion. The deal is a part of expanding Airtel's national long-distance network. The deal is also said to be covering a major part of Airtel's overall capex budget encompassing the non-radio network. The US Commerce Secretary Wilbur Ross had warned India in 2019 over using Huawei's 5G equipment for security reasons.

Semiconductor integration company pSemi opens design office in India

pSemi Corporation, a Murata company focused on semiconductor integration, has announced the opening of a new design centre in Chennai to support the growing demand for company's semiconductor products enabling 5G and IoT applications. "India is emerging as the largest mobile phone manufacturing hub in the world. With our new India design centre, we want to attract

top talent and further expand our engagements with customers, partners, and the smartphone ecosystem," said Sumit Tomar, CEO at pSemi.

Addverb Technologies inaugurates robots manufacturing facility in Noida

Addverb Technologies, an automation and robotics company in India, mentored by Jalaj Dani, has inaugurated its manufacturing facility 'Bot-Valley' in Noida. The company intends to create a self-sustaining ecosystem for the robotics industry in India that

can also export innovative products and disruptive technology solutions to the world. This new manufacturing unit is equipped with advanced electronic and mechanical machines and has a capacity to manufacture more than 50,000 robots of various types in a year.

Atotech inaugurates its development centre in Manesar industrial area

Atotech, a specialty chemicals technology and an electroplating solutions company, formally celebrated the inauguration of its Atotech Development Center (ADC) in the industrial area of Manesar, Gurgaon. Although the facility has been fully operational since late 2020, the pandemic delayed official inauguration of the ADC. Atotech offers solutions in verticals including smartphones and other consumer electronics, communications infrastructure, and computing, as well as in numerous industrial and consumer applications such as automotive, heavy machinery, and household appliances.

Super Plastronics announces ₹3 billion investment for intelligent TVs

Super Plastronics Pvt Ltd (SPPL), an exclusive brand licensee for Kodak HD LED TVs in India, has announced an investment of ₹3 billion to strengthen its capabilities in IoT technologies. Phased over three years, the investment will focus on building intelligent TVs that are intuitive and meet the demands of the new Indian customer. Avneet Singh Marwah, director & CEO, SPPL, has also been advocating for a PLI scheme around TV manufacturing in India.

Adani Green Energy raises \$1.35 billion in a renewable project financing deal

Adani Green Energy Limited (AGEL) raised a \$1.35 billion debt package for its under-construction renewable asset portfolio through definitive agreements signed with a group of leading international lenders. The revolving project finance facility would initially finance the 1.69GW hybrid portfolio of solar and wind renewable projects to be set up in four SPVs in the state of Rajasthan in India.
