

PLI scheme may add \$520 billion to GDP in five years

The production-linked incentive (PLI) scheme launched to boost local manufacturing may add \$520 billion to the gross domestic product in the next five years. According to analysts, electronics, particularly mobile phone manufactur-

ers, stand to be the biggest beneficiary of the scheme. Other sectors that will benefit include automobile, battery, pharma, food, textiles, and telecom.

The scheme is applicable for ten select sectors, which are labour-

intensive. It is expected to provide to the growing employment needs and achieving size and scale in manufacturing. As part of the scheme, the government has made a budgetary outlay of about \$26 billion.

Electronics manufacturing can contribute \$1 trillion to GDP: Ravi Shankar Prasad

Communications and IT Minister Ravi Shankar Prasad has said that scaling up electronics manufacturing in the country can alone contribute \$1 trillion to the economy. He added that the government has seen interest from

global majors like Apple, Samsung, and their contract manufacturers to scale up production in India.

Prasad added that by 2025, India will manufacture one billion phones, 50 million TVs, and 50 million hardware

devices, including laptops and tablets. India has a huge potential for manufacturing printed circuit boards, laptops, and IoT devices. The whole idea is that India must become a big global centre for mobile phone manufacturing.

Work to begin on Centre of Excellence for mobile accessories
