Indian Army signs contract with ideaForge to procure UAVs

The Indian Army has signed an approximately \$20 million contract for undisclosed quantities of a high-altitude variant of ideaForge's Switch UAV, which will be delivered over a period of one year. ideaForge was awarded this contract after it emerged as the only vendor that qualified the operational requirements in an evaluation done in real-world conditions, for a fast-track procurement.

Tesla sets up office in Bengaluru

Tesla has registered its Indian entity in the name of Tesla India Motors And Energy Private Limited in Bengaluru, Karnataka, according to documents filed in the Ministry of Corporate Affairs (MCA). It has been incorporated with an authorised capital of just 1.5 million rupees and a paid-up capital of only 100,000 rupees. Vaibhav Taneja, Venkatrangam Sreeram, and David Jon Feinstein will be the three directors of the new company.

JBM officially forays into EV space

JBM (Jay Bharat Maruti) Group has formed a new company, JBM Ecolife Mobility Private Limited, to use the growth opportunities in the electric vehicles segment including e-buses and to expand electric charging infrastructure. JBM Ecolife will sell electric buses and expand electric charging infrastructure for e-buses. The company had recently partnered with Microvast, a Chinese provider of fast-charging battery power systems, to produce pure electric buses. It will manufacture nine and twelve-metre electric buses equipped with fast-charging batteries from Microvast.

Dixon to make Motorola smartphones in India

The wholly owned subsidiary of Dixon Technologies, Padget Electronics, has signed an agreement with Motorola for manu-

facturing their smartphones. The products will be assembled at Padget's manufacturing facility situated in Noida, Uttar Pradesh. Padget Electronics is one among the five Indian companies that have been approved to receive incentives for incremental production of mobile phone handsets under the Production-Linked Incentive (PLI) scheme.

OneWeb secures additional funding from Softbank and Hughes

OneWeb, the low Earth orbit (LEO) satellite communications company jointly owned by the UK government and Bharti Global, has secured additional funding from SoftBank Group Corp. and Hughes Network Systems LLC, bringing OneWeb's total funding to \$1.4 billion. The capital raised to date positions the company to be fully funded for its first-generation satellite fleet, totaling 648 satellites, by the end of 2022.

Triton looking to set up EV manufacturing base in India

Triton Electric Vehicle LLC recognises India as one of the top three markets for it and thus, the company has strong plans for expanding in India. This expansion will be in the area of setting up a manufacturing base as well as developing a strong customer base for various models of Triton's electric vehicles (EVs). The company is in advanced stage of deliberations with Bharat Electronics Limited and there could be a joint venture between the two companies for manufacturing batteries and electronics systems for the energy storage system and EVs.

EESL has distributed 367 million LED bulbs across India

Under UJALA programme, EESL has distributed over 366.9 million LED bulbs across India. This, as per the Ministry of Power, has resulted in estimated energy savings of 47.65 billion kWh per year with avoided peak demand of 9,540MW and estimated GHG emission reduction of 38.59 million tonnes CO₂ per year. Additionally, over 7.2 million LED tubelights and over 2.3 million
