

Time Limit for Solar PV Manufacture

Table 6

Types of Solar PV Manufacturing Plant	Time allowed for commissioning
Stage -1: Manufacturing of Polysilicon from outsourced (imported/domestic M.G. silica + Stage-2: Manufacturing of Ingots-Wafers from Stage-1 Polysilicon + Stage-3: Manufacturing of solar cells from Stage-2 Wafers + Stage-4: Manufacturing of Modules from Stage-3 Solar Cells or Fully integrated manufacturing of Thin Film plant or Fully integrated plant of any other technology	Within 3 years from date of sanction
Stage-2: Manufacturing of ingots-Wafers from outsourced Polysilicon + Stage-3: Manufacturing of solar cells from Stage-2 Wafers + Stage-4: Manufacturing of Modules from Stage-3 Solar Cells or similar level of integration of any other technology	Within 2 years from date of sanction
Stage-3: Manufacturing of solar cells from outsourced Wafers + Stage-4: Manufacturing of Modules from Stage-3 Solar Cells or similar level of integration of any other technology	Within 1.5 years from date of sanction

Incentive on Components and Intermediates for Air-conditioners (₹ million)

Table 7

Segment	Year	PLI @	MINM. Cum. Incr. Investment	MINM. Incr. Sale	MINM. PLI	MINM. Cum. Incr. Investment	MINM. Incr. Sale	MINM. PLI
			LARGE INVESTMENT			NORMAL INVESTMENT		
ACs (Components[®])	2021-22		1,500			500		
	2022-23	6%	3,000	7,500		1,000	2,500	
	2023-24	6%	4,000	15,000	450	1,500	5,000	150
	2024-25	5%	5,000	20,000	900	2,250	7,500	300
	2025-26	5%	6,000	25,000	1,000	3,000	11,250	380

telecom and networking products, as the name suggests, targets to boost local manufacturing of these products in India. The Ministry of Communications, while announcing this scheme, noted that globally, telecom and networking products' exports present US\$100 billion market opportunity, which can be exploited by India.

"We welcome the issuance of detailed guidelines on implementation of the PLI scheme on telecom and networking equipment by DoT. Telecom is the backbone of a digitally connected India, and this initiative will further boost local manufacturing, exports and also create employment opportunities. India is already the second largest telecom market globally and this will go a long way in making the country a global hub for telecom innovation," said Lt Gen. Dr S.P. Kochhar, DG, COAI.

A minimum investment threshold of 100 million rupees has been set for MSMEs with incentives from seven to four percent. A ten times larger threshold has been set for the others with incentives from six percent to four percent over five years. The government of India expects this scheme to attract more than 30 billion rupees investment and generate huge direct and indirect employment.

"This is much needed effort and will result in Indian global champions with ₹12,195 crores (121.95 billion) incentive over next five years. One of the great initiatives is that for the first time, ₹1,000 crores (10 billion)
