

PEOPLE (on the move)

vice president and head of its ambitious Global Born Electric platform. Prior to joining M&M, Stulec was chief technology officer at StreetScooter, the world's largest electric vehicle delivery truck manufacturer.

Millind Kulkarni joins Vikram Solar as CTO

Renewable energy firm Vikram Solar has appointed Milind Kulkarni as its chief technical officer (CTO). Kulkarni has extensive experience spanning 24 years in the fields of technology development and deployment, product development,

application engineering, and pre-sales. He has experience in the renewables sector and is also experienced in various leadership roles across semiconductor technology and solar energy. He holds a PhD in chemical engineering and a master's degree in business administration from Washington University in St. Louis.

Amendments made in IGCR rules by CBIC

The Central Board of Indirect Taxes & Customs (CBIC) has announced there is no need to seek permission for each import consignment, and instead one-time import permission may be obtained for the quantities to be imported over a period of up to one year. The importer only needs to send an email to the local jurisdictional customs office, informing about the upcoming import consignment. In another facility for importers, the new rules allow the importer to temporarily unload their imported material in any warehouse, other than their own factory, with a pre-information to the custom authorities.

Companies including Dell and Lava apply for IT hardware PLI

Multinational companies including Dell, Wistron, Rising Stars Hi Tech (a Foxconn subsidiary), and Flextronics have shown interest in manufactur-
