Dixon's Noida (Uttar Pradesh) located manufacturing facility. Taiwanese smartphone manufacturer Foxconn, Google, and Qualcomm are some of the investors that have a stake in HMD Global.

STMicroelectronics joins the ZETA Alliance

STMicroelectronics has joined the ZETA Alliance, the industry body promoting ZETA low-power wide area network technology for low-cost, long-range IoT connectivity. Joining the Alliance as a promoter member, ST expects ZETA technology to further accelerate the spread of IoT in all territories worldwide. The standard lets developers create high-value IoT based solutions to challenges that face extreme cost constraints.

Teltonika Networks announces global distribution pact with Mouser Electronics

Teltonika Networks, a European developer and manufacturer of networking devices for industrial, IoT, and M2M applications, has announced its partnership with Mouser Electronics. Mouser Electronics added a record number of 74 new manufacturers to its industry-leading line card during 2020.

Renesas is acquiring Dialog Semiconductor

Renesas Electronics Corporation—a provider of power management, charging, AC/DC power conversion, Wi-Fi, and Bluetooth low energy (BLE) technology—has reached an agreement on the terms of a recommended all-cash acquisition of the entire issued and to be issued share capital of Dialog for EUR 67.50 per share, representing a total equity value of approximately EUR 4.9 billion.

Foxconn and Yulon Motor joint venture to roll out EV buses

A joint venture between Foxconn and Yulon Motor Co. Ltd aims to roll out their first electric vehicle (EV) bus this October, a source with knowledge of the situation said. The source said that the EV bus to be rolled out in October would be a prototype. Foxconn has ramped up its interest in EVs over the past year. It announced deals with Chinese EV maker Byton and Chinese automaker Zhejiang Geely Holding Group.

The other companies to invest in Tamil Nadu state include Sun Edison, which will invest ₹46.29 billion to make solar PV modules, and Ola Electric that will invest ₹23.54 billion to make electric vehicles and batteries.

Despite Covid 19, semiconductor market did better than expected

Despite the impact of Covid-19 on the global economy, the semiconductor market performed better than expected in 2020, fueled by the growth in cloud computing and demand for devices to support remote work and learning.

Worldwide semiconductor revenue

grew to \$442 billion in 2020, an increase of 5.4 percent compared to 2019, according to the Semiconductor Applications Forecaster from International Data Corporation (IDC).

Shortage of auto chips impacting global auto production

A shortage of auto chips could impact 672,000 units of global light vehicle production in the first quarter of 2021, data firm IHS Markit indicates.

It warned that the disruption could extend into the third quarter. Ford Motor, Toyota Motor, Fiat Chrysler Automobiles, and Nissan Motor have already cut output due to the short-

Intel invests another \$475 million in Vietnam

Intel Corporation has announced that it has invested a further \$475 million in Intel Products Vietnam (IPV). This new investment is in addition to Intel's \$1 billion investment to build a chip assembly and test manufacturing facility in Saigon Hi-Tech Park (SHTP), first announced in 2006. This takes Intel's total investment in its Vietnam facility to nearly US\$1.5 billion.

Evonexus partners with Arm to assist early-stage silicon startups

EvoNexus, an incubator for startups, has announced a partnership with Arm to assist early-stage silicon startups to reduce the cost of launching new ventures through no-cost access to Arm Flexible Access for Startups. The partnership will enable startups to have access to Arm IP, along with dedicated technical support from Arm engineers, at no cost.

SMIC unable to keep up with chip demand

China's Semiconductor Manufacturing International Corp (SMIC) said that it cannot meet customer demands for certain mature technologies and its plants have been running "fully loaded" for several quarters. Zhao Haijun, co-CEO of China's largest chipmaker, made the comments during a conference call after its latest quarterly results. He added that external sanctions would continue to affect the company's revenue growth.

VVDN's Vision Business Unit increasing design and manufacturing capabilities

VVDN Technologies is expanding its capabilities in design and manufacturing of high-end camera solutions with advanced edge AI processing. VVDN's Vision Business Unit has invested in gaining expertise on several high-end intelligent camera platforms, including AI processing functionality, to deliver high-speed edge analytics with reduced power consumption. Working on all AI subsets, including machine learning, deep learning, and convolutional neural network, VVDN is developing power-efficient, on-edge AI based camera devices.

age. Volkswagen has said the supply constraints would impact production at some of its plants in February.

Indian e-scooter and motorcycle market likely to grow at a CGR of 58%

The Indian electric scooter and motorcycle market, as per a report by Research and Markets, would reach a sales volume of over 1.08 million by the end of 2025, exhibiting a CAGR of 57.9 percent between 2020 and 2025.

In terms of retail sales value, the market is predicted to advance at a CAGR of 63.9 percent from 2020 to 2025 and attain a revenue of more than \$1.0 billion in 2025.
