

NeoDen Automatic SMT Pick and Place Assembly Line

NeoDen
www.neodentech.eu : Europe
www.neodenusa.com : USA
www.chipmax.in : India
www.emlogic.com.au : Australia
www.smtturkey.com : Turkey

- ★ Latest Software & Hardware Technology used, So no fear of Parts Obsolescence.
- ★ 45+ Agencies in Worldwide Provides Local Sales & Services.
- ★ Talented Innovative R&D brings out Outstanding Results.
- ★ TUV Certified.

Sole Exclusive Distributor for Sales & Services of NeoDen Products in INDIA

Difference between Public, Private and Consortium Blockchains

Table 1

Basis of difference	Public	Private	Consortium
Accessibility	Anyone	Single user	More than one central in-charge
Who can join?	Anyone	Permitted or known identities	Permitted or known identities
Consensus mechanism	PoS/PoW	Voting	Voting
Speed of transaction	Slow	Fast	Fast
Decentralisation	Completely and highly decentralised	Distributed	Decentralised
Transactions reading	Any node	Any node (without permission) or a list of predefined nodes	Any node or a list of predefined nodes
Data immutability	Yes, blockchain rollback is almost impossible	Yes, but blockchain rollback is possible	Yes, but blockchain rollback is possible
Features	• Censorship resistance • Unregulated and cross-border • Support of native assets • Anonymous identities • Scalable network architecture	• Applicable to highly regulated businesses • Efficient transactions throughput • Transactions without fees • Infrastructure rules are easier to manage • Better protection against external disturbances	
Examples	Bitcoin, Ethereum, Ripple	MultiChain, Quorum, HyperLedger, Tendermint	

a platform or solution. These offer open source platforms that are suitable for the required solution and commercial products as well. Example: R3.

Advantages of blockchain consortium

The following are some advantages we may expect from a blockchain consortium:

Cost savings. The basic idea of being a member of a blockchain consortium is to cut expenses. So, it offers cost-saving to the industry.

Learning acceleration. To grow in blockchain, it is significant to have ever learning support. So, consortia offer strong platforms for learning in terms of training and development support from experts.

Risk sharing. As blockchain is a new technology, definitely tons of risks are associated with it in the marketplace. But with a consortium, the members collaborate with each other and overall risks get reduced, whether the final solutions fail or succeed.

Mass adoption. Consortium plays a crucial role for mass adoption, which enables the companies to reach
