PLI scheme for telecom and networking approved by Union Cabinet

The Union Cabinet, chaired by prime minister Narendra Modi, has approved production linked incentive (PLI) scheme for telecom and networking products with a budgetary outlay of

121.95 billion rupees. It is expected that the scheme will bring more than 30-billion-rupee investment and generate huge direct and indirect employment.

There will be a minimum invest-

ment threshold of ₹100 million for MSMEs with incentives from 7% to 4% and ₹1,000 million for others with incentives from 6% to 4% over five years above the base year.

eRickshaw market in India to hit a million units

The market for eRickshaws, as per a report by Research and Markets, is forecast to reach close to a million units by FY25.

The reasons behind the increase

are said to be the revival of public transportation and tourism, demand from tier 1 & 2 cities, growing replacement demand, and an increase in penetration of vehicle financing.

These will go a long way in shaping the future of eRickshaws in the country such that the market has the potential to be fully electrified by 2030.

EV charging stations likely to increase over 46% annually until 2027

The global electric vehicle charging station market size is projected to reach 30.758 million units by 2027, from an estimated 2.115 million units in 2020, at a CAGR of 46.6 percent.

The market in the Indo Pacific region is projected to be the largest in terms of charging stations. The region comprises some of the fastest-developing economies of

the world such as China and India. Government policies in these countries are supportive of higher EV sales and related services such as EV charging.

PEOPLE (on the move)

India's nominee Ajay Mathur to head International Solar Alliance

India's nominee and current director general of TERI Ajay Mathur has been elected as new chief of International Solar Alliance (ISA). A coalition of 73 member countries, ISA aims to mobilise over \$1 trillion of investment into solar projects by 2030. This has to be done through policy and regulatory support, capacity building, and by overcoming perceived investment barriers.

Intel appoints Sunil Shenoy as senior vice president

Intel Corporation has announced the appointment of Sunil Shenoy as senior vice president and general manager of the Design Engineering Group, effective 1st February. Shenoy, a 33-year Intel veteran who departed in 2014, returns to the company to lead the critical work of design, development, validation, and manufacturing of intellectual properties and systems-on-chip (SoC) for client and data centre applications.
