

## Aiming Higher

### More Than 60 Years of Space Flight Heritage

With a proven track record of innovation, quality and reliability, Microchip continues to evolve as the foremost supplier of semiconductors to the aerospace and defense market. Our rapidly-expanding portfolio of highly-integrated technology supports the most demanding requirements for space, aviation and defense microelectronics. From radiation-hardened, space-grade solutions to advanced military and commercial aviation electronics, we've leveraged our expertise and product knowledge to build applications-based solution platforms that reduce integration risk, improve productivity and speed time to market.

- More than 60 years of space flight heritage with products qualified to the highest government, DLA, NASA and ESA standards
- Proven innovation, quality and reliability on aerospace platforms over the past 20 years
- Legacy of trusted, reliable and cyber-secure supply chain for defense microelectronics
