Global Semiconductor Wafer Inspection Equipment Market Forecast 2021 to 2025

The semiconductor wafer inspection equipment market is set to grow by US\$ 2.09 billion, progressing at a CAGR of almost 9 percent during 2021-2025. Growing demand for IoT devices is likely to emerge as one of the primary drivers of the market. However, the cyclic nature of the semiconductor industry may threaten the growth of the market.
