

BATTERIES FROM NUCLEAR WASTE

The 'Batteries From Nuclear Waste That Last Thousands Of Years' article published in November 2020 issue is an excellent and very interesting article on nuclear battery technology. This is the future for battery technology!

Ross Bennett

□ I enjoyed the article. It would be nice though if this battery could be made more efficient. I suspect it can be.

Curtis Blanco

□ I found 'Batteries From Nuclear Waste That Last Thousands Of Years' article to be an interesting and informative one.

Scoo

□ Curiosity, aka thinking outside the box, has been the inspiration for more advancements in many areas than anyone can imagine. I found this article extremely interesting. I doubt if I will see it being highly used. However, I am glad knowing that a solution to radioactive storage problem is being addressed. It gives me hope that my great grand kids and beyond will have a better life. Thanks for the article and please never stop teaching and learning.

Jon Pancost

EFY. Thanks for the feedback! Nice to know all of you liked the article.

ROTATING-WHEEL LED LIGHTS

This is regarding the 'Rotating-Wheel LED Lights For Decoration At Functions' DIY article published in March issue. How to connect power supply?

Atul Jmit

EFY. Power supply is given to the circuit through the 12V-0-12V, 500mA step-down transformer (X1). After assembling the circuit on PCB, connect the secondary side of transformer X1 to 'X1 Secondary' marked in the PCB and then switch on the circuit.

...

AUTOMATIC HAND SANITISER

I like 'IR Based Automatic Hand Sanitiser Dispenser' DIY project published in August 2020 issue. Where can I get soft copy of the mentioned project? Please help.

Daruru Sowmya

EFY. The article is already available on our website www.electronicsforu.com. You can download the article and save it in your PC for reference.

...

LIQUID LEVEL MONITORING SYSTEM

This is regarding 'Smartphone Based Liquid Level Monitoring System' DIY project published in October 2020 issue. Can you recreate this project with an ATTiny85? Using an ATmega328P seems like an overkill.

Patrick Joseph

The author Shibendu Mahata replies: Thank you for taking interest in this project and for your suggestion. Yes, the project can also be re-created using an ATTiny85.

...

SOCIAL DISTANCING ALARM CAP

I like 'Social Distancing Alarm Cap' DIY article published in October 2020 issue. How to upload Arduino code to Arduino Uno board?

Mohamed Azarudin

EFY. Uploading the code to Arduino board requires a few simple steps. First, you need to install the Arduino software (IDE) on your laptop/PC. Then connect your Arduino Uno board to the PC using a USB cable. Install the USB driver or update the driver software in your PC, if required. Open the Arduino IDE and then open the sketch (social_distancing.ino), select the correct COM port and Arduino board to upload the code to Arduino Uno board. You can also refer to the detailed steps given on following two websites: <https://www.dummies.com/computers/arduino/how-to-upload-a-sketch-to-an-arduino/> and <https://www.arduino.cc/en/Guide/ArduinoUno>

...

GROUP MESSENGER

There is a correction in 'Group Messenger' DIY article published in March issue. The reset button S2 should not be connected between Vcc and ground. Instead, S2 should be connected between $\overline{\text{RST}}$ pin of IC2 and ground rail of the power supply.

Mukesh Kumar

Electronics engineer (R&D)
Techshlok

EFY. Thanks for pointing out the mistake! Part of the circuit with correction is shown in Fig. 1. The same correction should also be implemented in PCB as well.

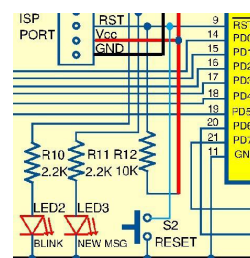

Fig. 1: Reset button S2 connected to RST pin

Note. Most articles published in EFY magazine can also be read at our website <https://www.electronicsforu.com> after some time, including DIY articles whose components can be purchased from our kitsnspares.com website (or by writing to info@kitsnspares.com).
