UP, Karnataka, Bihar top EV sales in FY21

Uttar Pradesh, Bihar, and Karnataka topped electric vehicle (EV) sales in the fiscal of 2021. Uttar Pradesh alone contributed 23 percent of the country's sales with 31,584 EVs sold in FY21. The top ten states together made 88 percent of all EVs sold in India. Tripura leads with the highest share of EVs per 1,000 internal combustion engine (ICE) vehicles, with 52 EVs sold for every 1,000 ICE vehicles in FY21. Additionally, of all vehicle registrations in the year, 0.88 percent was for EVs - the highest share EVs have achieved till date.

IT & ITes manufacturing hub to be developed in Bihar

The government of Bihar's department of Information Technology is making renewed efforts to bring in major investments in the IT & ITes Services and Electronics Manufacturing sector in the state and develop an emerging IT hub. IT investments in the state of Bihar are expected to grow at a CAGR of over twenty percent during 2017-22. The state government has established a start-up hub in Patna as a technology innovation and incubation zone to promote innovation, incubation, and entrepreneurship, where start-ups will have access to plug-and-play infrastructure, quality power, seamless Internet connectivity at subsidised rates, and

much-needed services in consulting, training, implementation, incubation, and statutory compliances.

Delhi government planning to finance EV fleets

The government of Delhi is working on an interest subvention scheme, which once deployed will help commercial fleet owners in sourcing electric vehicles. Once ready, the scheme will be offered through the Delhi Finance Corporation (DFC). Kailash Gahlot, Transport & Environment minister of Delhi, in a conversation with a leading media house said that many fleet owners are unable to switch to electric vehicles due to lack of financing. He also recently said that the state government will now buy only electric buses for Delhi. The government is planning to introduce 1,000 electric buses in Delhi by the end of year 2021.

Semiconductor incubation programme soon for start-ups

NXP India, in collaboration with the Ministry of Electronics and Information Technology and Fabless Chip Design Incubator, is planning to launch the first 'Semiconductor Startup Incubation and Acceleration Programme' with an aim to find, facilitate, and mentor semiconductor and IP design start-ups across India. In this programme, five promising start-ups will be incubated for two years in each cohort every year. It will also provide a platform for start-ups to showcase their products to investors and the business community.
