

HIOKI

HIOKI's Solution for Data Center & Battery Bank

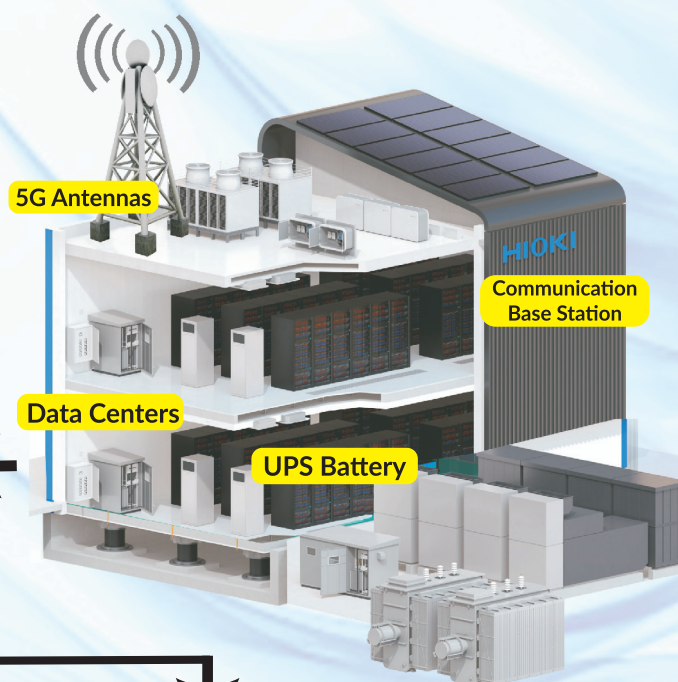

Believe in Invention

Battery Bank

Verify the quality of power
from UPS Power System

Battery
Tester
BT3554-50

Key Features

- Battery measurement can be performed while the battery is connected to its host device, without taking it offline
- Measure and save data in as fast as 2 seconds, a 60% improvement from the legacy 3554
- Instantaneously diagnose battery degradation (PASS, WARNING, FAIL) by measuring internal resistance and voltage (*1)
- Noise reduction technology improves noise resistance
- Screen and audio (*2) guidance simplifies measurement
- Measurement data is linked to site information and saved, reducing management man-hours
- Easily transfer measurement data to your smartphone or tablet by using our free app GENNECT Cross (*3) or to an Excel® file. (Wireless Adapter Z3210 is necessary)
- New protector delivers better ergonomic hold and durability in the field.

Power
Quality
Analyzer
PQ3198

Key Features

- Maintain and manage power supplies and analyze problems more easily and reliably than ever before
- Analyze equipment power problems
- Record quality data for power systems, Measure AC/DC power, Two-circuit measurement, GPS time synchronization, Simple inverter measurement, No need for an external power supply
- Remote Monitoring of a Site's Power Supply Quality [GENNECT One SF4000]
- International standard IEC 61000-4-30 Ed. 2 Class A compliant
- High-voltage, wideband performance
- Verify the quality of power supplied by an EV rapid charger
- Wide array of ranges to accommodate all applications
- Automatic sensor detection to avoid erroneous measurement
- Capture power anomalies reliably with simple settings
