

STM32Cube enhanced with Azure RTOS, now available for the STM32H7 MCU series

COMPREHENSIVE SOFTWARE OFFERING, REDUCING DEVELOPMENT EFFORT, TIME AND COST

The STM32Cube ecosystem is a software solution for STM32 microcontrollers and microprocessors, created for both designers interested in a free comprehensive development environment for STM32 microcontrollers and microprocessors, and for users looking to integrate STM32 software in their existing IDE, such as Keil or IAR IDEs.

STM32Cube is a combination of software tools and embedded software libraries:

A full set of PC software tools addressing each step of a complete project development cycle : Configuration, Development, Programming and Monitoring.

Embedded software bricks enabling advanced functionalities in STM32 microcontrollers and microprocessors (from MCU drivers to more advanced application-oriented features)

Production Licence for any STM32
