nPM1100

Ultra-small form-factor
Power Management
IC (PMIC) for
charging batteries
& power delivery

The nPM1100 is a dedicated power management IC (PMIC) with a highly efficient dual-mode configurable buck regulator and integrated battery charger. It is designed as a complementary component to Nordic's nRF52® Series and nRF53® Series System-on-Chips (SoCs) to ensure reliable power delivery and stable operation, whilst maximizing battery life through high efficiency and low quiescent currents.

IC Features

- 400 mA battery charger
- Automatic charging mode
- Battery thermal protection
- Highly efficient regulator
- Input regulator with USB support
- Ship mode that disables power output
- -40°C to 85°C operating temperature

Technical Support

- nPM1100 EK
- Platform to evaluate features with no additional Software required
- Pin headers for all pins
- Connectors : USB, Battery
- Switches for ICHRG, VTERM, ISET, VOUTB and MODE
- Buttons for ship mode enter and exit
- No additional HW required
- Indication LED's : Charge, Error

Combo Package with discounted nPM1100 EK + PPK II
