

I-STEM: Strengthen the Indigenous Development of Scientific Instruments

After establishing a National web portal through which R&D equipment in institutions across the country can be located and accessed in a transparent way, I-STEM is entering a New Phase with the following objectives –

- ▶ Working towards a more comprehensive listing of R&D facilities. Availability, and their active use
- ▶ Providing partial assistance to Tier 2 and Tier 3 institutions for the maintenance of facilities shared through I-STEM through Comprehensive AMC program
- ▶ Partial assistance to Users from Tier 2 and Tier 3 institutions who use facilities through I-STEM
- ▶ Promoting the indigenous development – especially by startups – of scientific equipment and value-added technical supplies, including software, used for R&D; enabling such development via the (national) Digital Catalogue of indigenously developed technologies and products maintained by the I-STEM portal
- ▶ Establishing regional centres for providing technical training and skill development, in part by restoring/stripping R&D equipment written off by I-STEM institutions; thus developing a stream of talent and gainful employment through maintaining and upgrading R&D facilities
- ▶ Providing access through the web to R&D software platforms to Academic Users to promote R&D and more effective instruction/learning, especially in smaller institutions.

VIRTUAL SYSTEM ON CHIP SOFTWARE

Decentralized Cloud, IoT & Data Center

COMPLETE ALTERNATIVE FOR:

VMware OpenStack Hyper-V Routers Switches Storage [SAN/NAS]

Exponential Reduction in: Total Cost • Complexity • Manpower

SYNCHROKNOT

- vSoC Does Everything
- No Separate Server Hardware
- No Separate Switches & Routers
- No Separate SAN/NAS Storage
- No Expensive Licenses

Exponential Increase in Performance,
Security & Scalability

Purchase vSoC licenses and deploy
directly in your organization
