Nordic nRF9160

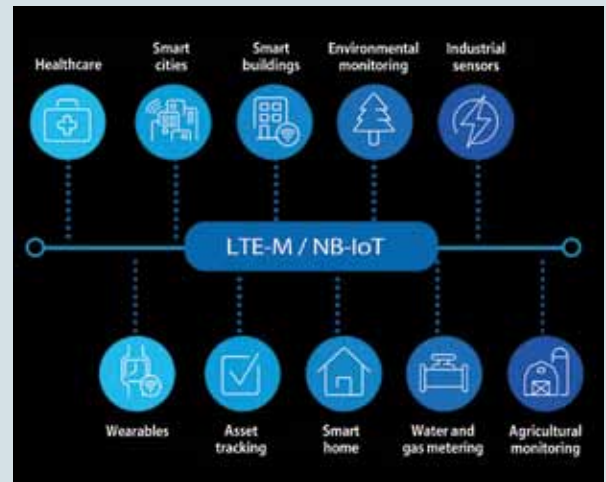

Low power SiP with
integrated LTE-M/NB-IoT
modem and GPS

The nRF9160 is a compact, highly integrated System-in-Package (SiP) that makes the latest low power LTE technology and advanced processing and security accessible, and easy to use, for a wide range of single device low power cellular IoT (LoT) designs.

nRF9160 SiP includes below features:

- Single Global support device with both LTE M & NB-IoT modes
- In built GPS enabling Location tracking
- Incorporating an Arm Cortex-M33 application processor with 1MB flash & 256 KB RAM enabling one chip solutions developments
- Enhanced Security with Arm TrustZone + Arm CryptoCell
- Rich peripheral interfaces including ADC, RTC, SPI, I²C, I²S, UART, PDM and PWM.
- Supports nRF cloud services along with FOTA, Location services

Our offerings:

- ▶ Samples & EV Boards
- ▶ Technical support for designing
- ▶ RF testing of Customer Product (Nordic)

Millennium Semiconductors is an authorized distributor of Nordic Semiconductor
