

(ORv3) power shelf minimises power consumption and improves the reliability of compute and storage applications in hyperscale and enterprise data centres. Featuring power supplies with

demonstrated efficiency of 97%, the new Artesyn 2U shelf incorporates a hot swappable controller and can accommodate up to twelve 48V, 3kW open-rack rectifiers with power up to 30kW. These rectifiers include an embedded automatic transfer switch capability that switches input to a secondary AC source on detection of primary AC power loss without any interruption to output voltage.

## Timing and synchronisation system

The TimeProvider 4100 Release 2.3 precision timing grandmaster meets the requirement of acquiring and maintain-

ing communication signals for precise timing from GPS or other worldwide satellite constellations. It comes with the industry's very latest IEEE 1588 v2.1 2019 security standard for protection of timing systems. TimeProvider 4100 Release 2.3 provides more deployment flexibility with support for two PTP server profiles on every Ethernet port. Customers can now optimise usage of these ports without additional hardware investments. TimeProvider Release 2.3 also allows PTP server, PTP client, and in-band management to be used on a single port.

## Secure IoT authentication service

The CIRRENT Cloud ID, a service that automates cloud certificate provisioning and IoT device-to-cloud authentication, offers easy-to-use service that extends the chain of trust and makes tasks easier and more secure from chip-to-cloud, lowering companies' total

cost of ownership. Cloud ID is ideal for cloud-connected product companies in the industrial, consumer, healthcare, medical, and manufacturing industries.

## Remote access solution

OEMs can now more easily realise the benefits of remote access using the new remote access solution for industrial equipment. The remote access solution incorporates robust security capabilities including multi-factor authentication and encrypted protocols. A digital input

also gives on-site staff control of remote connections, so they are made only when enabled locally. OEMs can use the solution to reimagine how they support customers such as with virtual commissioning and remote firmware management.

## Solar streetlights

The new range of solar streetlights delivers high-quality illumination for outdoor spaces. This series includes two product variants, Integrated and 2in1 solar streetlight, which offer a

luminous efficacy of over 105lm/W, a life expectancy of over 50,000 hours, and an IP 66 rating, ensuring protection even in the harshest outdoor circumstances. These lamps increase charging efficiency by around 25% by utilising the energy harvested by solar PV modules. These can be used in streets, compounds, parks, parking areas, military and civilian security installations, airports, etc.

# Share Your Knowledge

**If you are an expert in your field of electronics, why not share your knowledge with the world?**

Electronics For You invites electronics professionals and industry experts to write articles on their area of expertise and interest from different perspectives

Some of the topics we want you to write about are:

- Smart World
- Artificial Intelligence
- Autonomous Cars
- Bio-Medical (Healthcare)
- Strategic (Defence) Electronics
- Audio-Video
- Project Reports

So if you have an interesting topic or original article to share, please let us know at [efyeditorial@efyindia.com](mailto:efyeditorial@efyindia.com)

*We would love to hear your good ideas too!*
