

the codes can be safely saved in the Google drive itself by just mounting it and giving permission to Colab to

access your drive. These advantages of Colab makes it very popular among the beginners, researchers, and devel-

opers to build their projects and access them on the go.

Work environment

This section can be skipped by beginners in Python. Work environment is completely online and can be visualised by visiting the link below in any internet browser such as

[tinyurl.com/EFYdiyWE](https://drive.google.com/drive/folders/1qI7pOwR_vlm7TF9p5jZ-xU4-G4jEK9t?usp=sharing), or
https://drive.google.com/drive/folders/1qI7pOwR_vlm7TF9p5jZ-xU4-G4jEK9t?usp=sharing

The environment consists of four files as shown in Fig. 2.

1. OnlineResponses. Google sheet containing participant information (provided by participants through a Google form created for an event).

2. font_playfair.ttf. True Type Font (.ttf) file which decides the font style being used for printing text on the image.

3. BlankCertificate.jpg. Image file consisting of the certificate.

4. AutomaticCertificateGeneration.ipynb. Ipython Notebook file where the code is to be executed.

Procedure to run the project

Step 1. Access Google Colaboratory by visiting the link below using an internet browser like Google Chrome, Internet Explorer, or Mozilla Firefox. The longer version of URL (uniform resource locator) is provided in case tinyurl is deprecated such as

[tinyurl.com/EFYdiy](https://colab.research.google.com/drive/1y_FMhXHHr0jnACirAcSVBTFoWXL9iuYq?usp=sharing), or
https://colab.research.google.com/drive/1y_FMhXHHr0jnACirAcSVBTFoWXL9iuYq?usp=sharing

If not signed in, click on 'Sign in' button as shown in Fig. 3 and join with your Google (Gmail) account.

Step 2. From the menu bar, select 'Runtime' and select 'Run All' as shown in Fig. 4.

Step 3. Colab will ask for authorisation to access your Google drive using 'Google Cloud SDK' as shown in Fig. 5. Click on the link generated in the code and complete authorisation by pressing Enter. This is a security step and has to be completed every time this project is executed.

Step 4. The code continues its execution and asks for one last input as in Fig. 6. For testing this project, type 'test' (only four small-case letters) and press Enter. (After learning the project,
