DRAM Prices Expected to Retreat in 4Q21

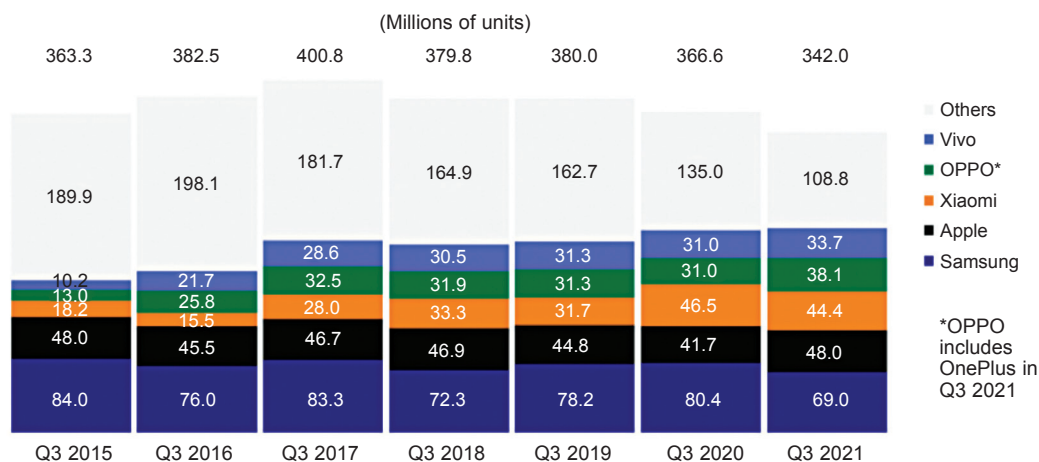

PC and server manufacturers are expected to curtail their high level of DRAM purchases in 4Q21 in order to burn through existing inventory, causing a 0.5% slip in PC and server DRAM prices in 4Q21. In light of lower mobile DRAM prices that are anticipated in 2022, smartphone makers remain cautious about purchasing too much DRAM in 4Q21 which is expected to keep prices for mobile DRAM flat in 4Q21.

Global Smartphone Market Registers Highest Ever Third Quarter Revenue

Smartphone shipments reached 342 million units globally in Q3 2021, growing by 6% QoQ. However, the market declined 6% YoY due to the ongoing global component shortages and slow recovery of key markets such as China and parts of Europe. Apple led the smartphone market revenue, capturing around 37% of the market.
