

“Fun Is The Formula That Amplifies Success And Happiness”

There are hundreds of fabless semiconductor design companies in the world, and probably a hundred in India alone. But like Neil Armstrong was the first human to set foot on the moon, do you know the name of the first fabless semiconductor product company to originate from India? This story is about a man and his dream to make India a global brand in the field of semiconductors.

This individual is known for his problem-solving skills in the semiconductor industry, one who quit his PhD in mid to pursue his dream in Silicon Valley and is now making Moschip, the first fabless company from India, a global brand. He is the man behind designing a curriculum that has helped thousands of students get into chip design in India and abroad. This is Venkata Simhadri's story as told to Electronics For You's Business Editor Mukul Yudhveer Singh!

Venkata Simhadri
CEO & MD, MosChip

Born in Machilipatnam (Andhra Pradesh), Venkata got interested in physics and mathematics at an early age. The motivation to pursue these subjects, as he explains, came from his father, who happened to be a physics pro-

fessor. Venkata's father, understanding the importance of education, got him shifted to a town called Kandukur in Andhra Pradesh, and this is where Venkata did most of his schooling. Though Venkata is a successful Silicon Valley entrepreneur today, it is hard
