

# At-a-glance view of key industry trends that can shape the future of your business...

## ADAS Common in New Cars, Still a Very Big Opportunity

A third of new cars now sell with ADAS features in major markets such as Mainland China, Europe, Japan and the US, but it will be several years before they are installed in half of all cars on the world's roads. There were 1.05 billion cars in use around the world at the end of 2020. But the key ADAS features were only installed in approximately 10%.

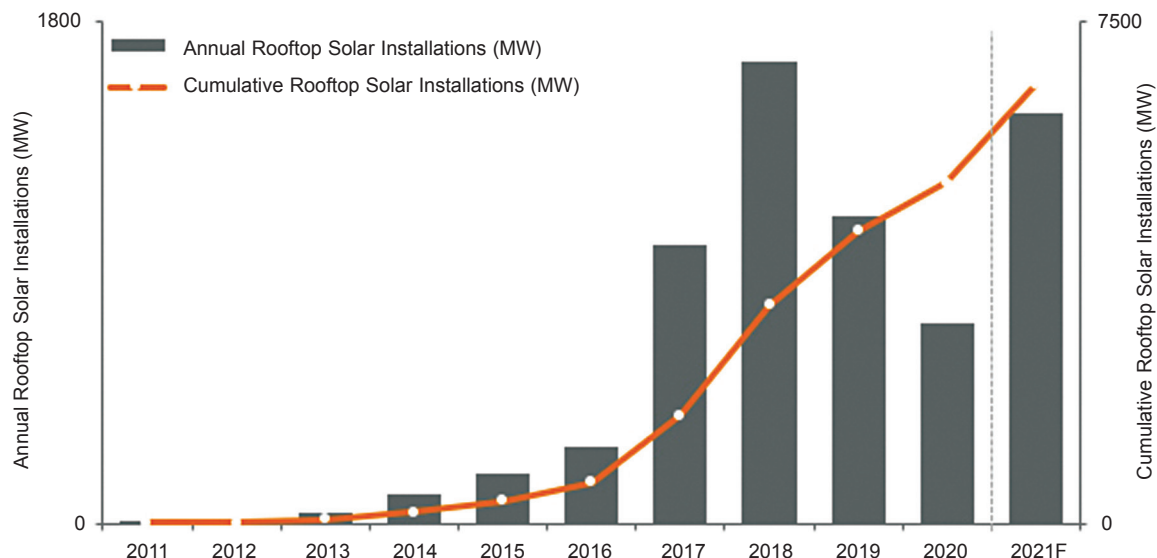

Percentage of cars in use with feature
