Four Heads with 360° Orientations:

The mounting head is designed in a suspended, fully symmetric & high degree coupling way, to ensure

- High Speed Component Mounting.
- Yet Gentle & Smooth Operation.
- Efficient Component Detection System supports both Vacuum detection & Vision Inspection.

Integrated Industrial Host & Solid State Drivers:

To achieve high Stable & Sturdy performance, Quick response to each process with high Power-off Protection. The machine firmware supports remote system up gradation.

Automatic Electric Feeders and Peelers with Brush Less Motor:

Patented, Electronic Feeders design adopts new technique-feeding system with auto error corrections to ensuring smooth error free feeding and precious picking with the most accurate pickup point.

Universal Interface Port:

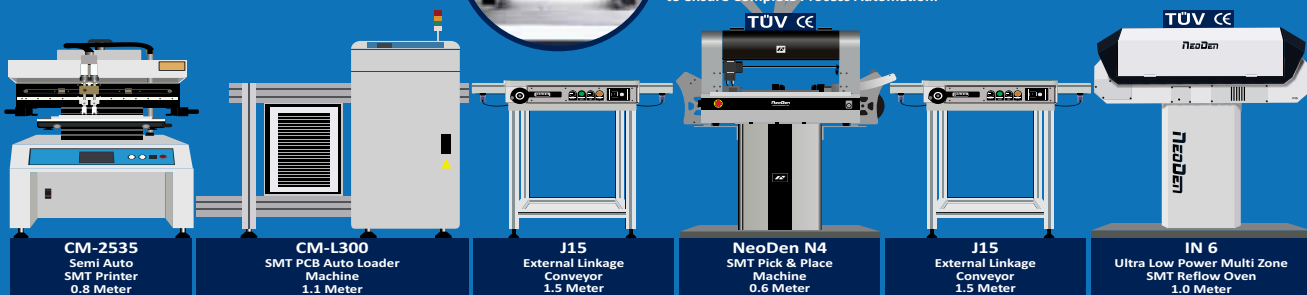

Apart from machine's automated performance, this facility ensures process automation also by linking external conveyor.

High Speed Flying Vision Camera System:

Highly Accurate and High Speed Vision System using to Identify, Detection & Auto calibrate the different components of the 4 heads, at once, on Flying mode, with high speed and accurate. The Top & Bottom camera systems positioned at non obstruction work area.

Built-in Automatic Conveyor System:

Complementing the mounting capacity of the machine up to 1.2 meters PCB size. Also synchronizing the external conveyor links to both Solder Paste Printer & Reflow Oven to ensure Complete Process Automation.

Sole Exclusive Distributor for Sales & Services of NeoDen Products in INDIA
