

Indian Space Association launched by prime minister

Prime Minister Narendra Modi launched on 11th October the Indian Space Association (ISpA)—the premier industry association of space and satellite companies. ISpA aims to contribute to the government of India's vision of making India self-dependent (*atmanirbhar*) and a global leader in the space arena. Its founding members include Bharti Airtel, Larson & Toubro, Nelco (Tata Group), OneWeb, Mapmyindia, Walchandnagar Industries, and Alpha Design Technologies. Other core members include Godrej, Hughes India, Ananth Technology Limited, Azista-BST Aerospace Private Limited, BEL, Centum Electronics, and Maxar India.

IESA expects contribution of electronics to GDP to double

India Electronics and Semiconductor Association (IESA) expects the electronics sector's contribution to the GDP to double in a couple of years. Currently, the electronics import bill for India is the second-highest after petroleum and petroleum products. IESA Chairman Rajeev Khushu said that—with a series of government interventions like PMP, SPECS, and PLI—India is set to become the global hub for electronic products manufacture. The Indian electronics market is considered one of the largest in the world and is expected to hit \$400 billion by 2025.

Agreement likely with Taiwan on \$7.5-billion chip plant

India and Taiwan are in talks on an agreement that could bring chip manufacturing to India along with tariff reductions on components for producing semiconductors by the end of the year. Officials from New Delhi and Taipei have met in recent weeks to discuss a deal that would bring a chip plant worth an estimated \$7.5 billion to India to service everything from 5G devices to electric cars.

A report for potential investors to analyse India's industrial parks

Second edition of the Industrial Park

Representational image

Rating System (IPRS) report has been launched by the Minister of State for Commerce & Industry, Som Prakash. The report is an extension of the India Industrial Land Bank, which features more than 4,400 industrial parks in a GIS-enabled database to help investors identify their preferred location for investment. The portal is currently integrated with industry based GIS systems of 21 states and Union territories; plot-wise information therein is updated on a real-time basis.

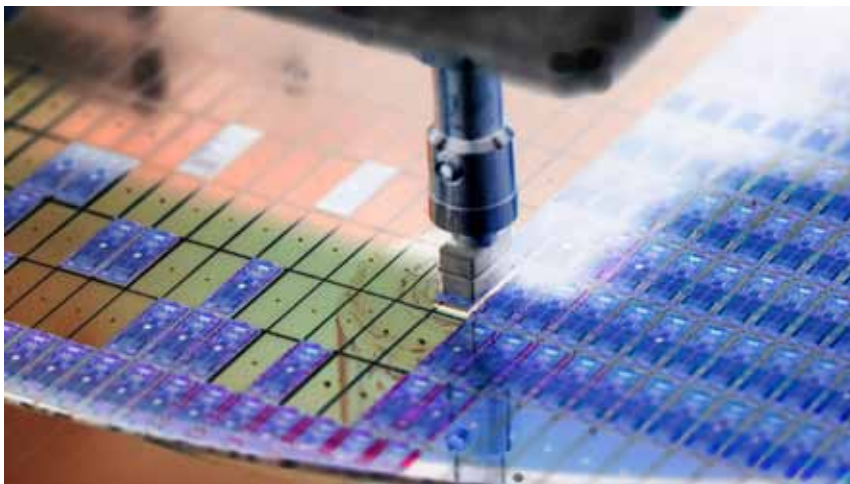

Semiconductor fab in India likely within three to five years

A policy for making India a champion in electronics design and semiconductors is in the works at the Ministry of Electronics and IT. Rajeev Chandrashekhar, the Minister of State for Electronics and IT, has announced that the ministry is working on a plan

that would materialise semiconductor fabrication in the country within the next three to five years. India currently relies on imports for all its semiconductor needs. The demand is estimated to reach around \$100 billion by 2025 from about \$24 billion as of now.

Testing and approved certification being made mandatory from July

It would become impossible to sell items like smartwatches, smart cameras, trackers, smart electricity meters, and base stations for telecom networks in India without having a testing and approved certification from an accredited testing lab in the country. The Department of Telecommunications has issued fresh guidelines and informed that the mandate would come into effect from 1st July, 2022. Optical fibre, LAN switches, routers,
