Dixon starts making 5G millimetre-wave phone for the USA

Ajay Prakash Sawhney, Secretary, Ministry of Electronics & Information Technology, launched the first 5G millimetre-wave phone manufactured by Dixon Technologies at one of its facilities in India. Dixon has started exporting such phones to the United States. The new Orbic Myra 5G UW is the first 5G millimetre-wave product to be produced in India for export to the US. Dixon Technologies is one of the fourteen companies (domestic and international) that have been granted approval under the PLI scheme of government of India for IT hardware manufacturing.

Eveready Industries evaluating installation of Advance Cell Chemistry Project

Battery maker Eveready Industries is looking at scaling up business, both in terms of turnover and profitability, for which it is eyeing opportunities to see which products can be added under its brand in the coming two-three years. "We are evaluating installing the Advance Cell Chemistry Project. We are waiting for the PLI details as it will act as a sweetener. It entails huge capex. However, the project viability will depend on future demand for lithium based batteries," Exide MD & CEO Subir Chakraborty said on the sidelines of the company's AGM.

Adani Green Energy completes acquisition of SB Energy

Adani Group's renewable energy unit Adani Green Energy Ltd (AGEL) has announced that it has completed the acquisition of SB Energy Holdings Ltd (SB Energy India) in an all-cash deal at an enterprise valuation of \$3.5 billion (₹26,000 crore), the largest such acquisition in the renewable energy sector in India. The value-accretive acquisition boosts AGEL's operational portfolio to

5.4GW and its overall portfolio to 19.8GW, implying a four times growth locked-in.

Causis E-Mobility signs pact for EV manufacture in Maharashtra

The Maharashtra government has signed a pact with Causis E-Mobility Pvt Ltd to set up an EV manufacturing facility in the state. Under the agreement, Causis E-Mobility Pvt Ltd, a joint venture of the UK based Causis Group, will invest 28 billion rupees in two phases. The state government had unveiled a comprehensive electrical vehicle policy in July 2021 to stimulate the manufacturing of battery electric vehicles in the state.

Tata Group offers to acquire 26% stake in Tejas Networks

Tata Group has made an open offer to acquire up to 26% stake in domestic telecom gear firm Tejas Networks. The offer involves an amount of 10.38 billion rupees, including purchase of approximately ten million equity shares of Tejas Networks at around 258 rupees per share. Tata Sons and its subsidiaries Panatone Finvest and Aka Shastha Technologies are said to be involved in the offer.

RattanIndia forms subsidiary to start drone business in India

RattanIndia has incorporated a wholly owned subsidiary to start UAV drone business in India. Dubbed NeoSky India Limited, the subsidiary will focus on creating drone solutions for diverse industries. RattanIndia had earlier appointed Peeyush Kumar as the head of drone business operations in the country. Kumar was associated with Pixella, a drone company, as CEO before his association with RattanIndia's NeoSky.

satellite communications equipment, PoS devices, and more will be brought under the same radar during the fourth phase of the regime.

Record growth of open access solar installations in April-June quarter

Solar open access installations in India grew by a record 664% year-on-year, reaching 209MW in the second quarter of 2021 from 27MW a year ago. In the first half of 2021, Uttar Pradesh had the highest number of installations in the solar open access segment, followed by Maharashtra and Tamil Nadu. As of June 30, 2021, Karnataka is the biggest market for solar open access cumulatively, followed by Rajasthan, Madhya Pradesh, Andhra Pradesh, and Tamil Nadu.

Electric vehicles would form a major chunk of all vehicles by 2030

Union Minister for Road Transport & Highways Nitin Gadkari has said

Representational image

that by 2030, 80% of two-wheelers and 30% of private vehicles will be electric in India. Lithium is now being made in India to the extent of 80% and there is no shortage, the minister said, addressing fears of a shortage and import concerns of lithium-ion for the batteries. "Its cost is getting less too. Do not think lithium-ion is

a problem," he said. He also said that, with petrol and diesel being widely used, their import bill is currently at 8,000 billion rupees, which is likely to increase to 25,000 billion rupees in the next five years.

DGCA releases airspace map for drone operations in India

The Union Civil Aviation Ministry has released India's airspace map for drone operations. Additionally, the Centre has added drones under the

production-linked incentive (PLI) schemes. The PLI scheme for drones and drone components industry addresses the strategic, tactical, and operational uses of this revolutionary technology. The drones and drone components manufacturing industry may see an investment of over 50 billion rupees over the next three years.
