

Ultra High Efficiency LED tube light
Effectively MORE ECONOMICAL than other LED tube lights
Lower Power Consumption recovers initial cost within a few months!

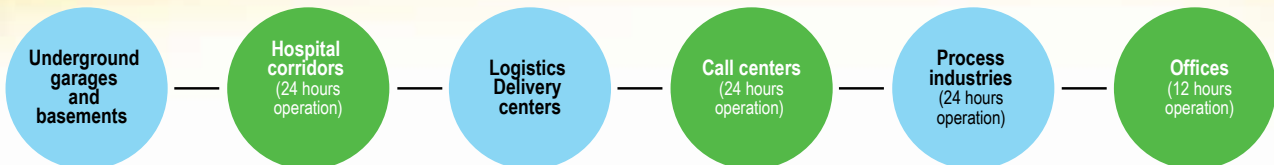

**Binay
Ultra High Efficiency
PowerLED Tube Light /
Batten fitting**

- **Designed Life of up to 10 years for 24x7 operation**
- 5-year warranty for LEDs
- Very high efficiency gives same light output of 20W LED tube light, **but in 12W power consumption only**
- **Savings of up to Rs 700 per year per tube light**
- High CRI of 85

Best suitable for applications which are running for large number of hours per day, such as:

A COMPARISON BETWEEN BINAY POWERLED TUBE LIGHTS AND LED TYPE TUBE LIGHTS AVAILABLE IN THE MARKET

BINAY Ultra High Efficiency PowerLED Tube Light		LED type tube lights available in the market using SMD LEDs (NOTE: these are NOT Power LEDs)	
	Power consumption 10 to 12 watts		Power consumption 18-20 watts
Lux	Lux levels equivalent to fluorescent T-8		No standard; light output can reduce sharply within a few months
	Warranty 5 years (recovers cost of product during much before end of warranty period)		Warranty 1 or 2 years only
LM-80	LED quality as certified by LM-80		LM-80 for LEDs not available (does not satisfy the requirement)
	Up to 100,000 hours to L-70 lumen maintenance		Not specified
	Excellent thermal management. Aluminium body having a heatsinking surface area of 192 square inches		Heatsinking not provided (as these tube lights use cheap plastic housings to save cost). NO heatsinking, hence thermal management NOT satisfactory.
	Minimal (practically indiscernible) colour shift over time		Output colour changes within 6 months. Not suitable where colour consistency is required
