

“Networking And Connecting Are Two Arts That Every Leader Should Master”

Sanjeev Keskar
Arvind Consultancy

Belonging to a middle-class family, Sanjeev Keskar learnt to be content in whatever was on the plate. However, his passion for knowledge always kept him on top of his game. Missing out on an engineering seat and working with a small firm has been the greatest lessons of his life. He has led not one but many American companies in India.

Helping startups in their journey with an early retirement from an active career, he helped the likes of National Semiconductor, Freescale Semiconductor, and AMD root their origins in India, the man who became the Chair of IESA and MD of Arrow Electronics. This is Sanjeev Keskar's story!

By: Mukul Yudhveer Singh

Keskar, whose father worked with the Bank of Maharashtra, had to move with family whenever his father got transferred to a new city. As a matter of fact, transfers in that era usually took place every three or four years. Keskar completed his primary schooling from a school located in a small village called Mul in the district of Chandrapur (Maharashtra). He completed the 5th and 6th standard from a school in Pune, sixth to ninth standard from Nagpur, and tenth to twelfth from Aurangabad.
