

is prouder that he has zero enemies, both in his personal as well as professional life.

The strong support of wife

“My biggest support of my life is my wife Sangita. We met in 1982 and married in 1990. Ours was a long-distance relationship and we met only once or twice every year. During that period there were no mobile phones then, the only medium for communication was letters,” says an emotional Keskar.

His wife did her MD in Pathology after marriage and is currently serving as the head of Pathology at Chinmaya Mission Hospital in Bangalore. She is also an NABL assessor. He adds, “I was amazed to see how she balanced her professional and personal life. She is an amazing cook and has always supported our sons in their studies.” And what’s the most romantic thing Keskar had done for Sangita, he answers, “I always listen to her every advice.”

The couple’s two sons, Ajinkya and Aditya, are on their way to completing their PhD from the United States. Ajinkya is pursuing PhD in Eco-

nomics from Rice University, Houston, Texas. Aditya, the younger one, is pursuing PhD in Renewable Energy at Raleigh State University, North Carolina. The elder son Ajinkya is married to Shreya, who has done her Master’s degree from the University Of Santa Barbara in Environmental Sciences and is also working in the USA.

After 35 years of corporate career and at the peak of his career as MD of Arrow Electronics India, Keskar decided to leave corporate world in 2020 and started his own consultancy

firm to support Make in India projects and startups to develop high-value-added local eco system for electronics and semiconductor components. He started a consulting firm named after his father, Arvind.

“I could have worked with Arrow for another four years but I think it is the right time now to help startups in India,” he says. Keskar is also the chief mentor at STPI IOT Open Lab that is run and managed by Software Technology Parks of India (STPI) and Arrow Electronics. **EFY**
