India Is Expected To Lead The Battery Storage Market In The Long Run

India's leadership in the battery storage market will be driven by robust solar energy generation targets and strong end-customer demand. Praxis Global Alliance expects that the next 10 to 15 years are crucial for India to gain a leadership position.

Electric Two-Wheelers Expected To Reach Price Parity By 2027 in India

International Council on Clean Transportation (ICCT) estimates that electric two-wheelers in India could likely reach price parity with their petrol counterparts by 2027. For the study, ICCT compared electric motorcycles and scooters with different battery sizes and varying ranges, concluding that an electric motorcycle with a 100-kilometre range would achieve cost parity with a similar petrol powered bike by 2027.
