investments of \$165 million value in entire 2020, and 22 deals worth \$490 million in 2019. The investments range from battery makers to energy storage to original equipment manufacturers. The investment tally includes renewable energy companies Fourth Partner Energy and Fortum that also operate in the electric mobility space.

India now exporting mobiles worth \$3 billion: PM Modi

Narendra Modi, Prime Minister of India, in his Independence Day

that the PLI scheme is bringing. Seven years ago, we used to import mobile phones worth approximately \$8 billion. Today, we are exporting mobile phones worth \$3 billion," noted the PM.

Two more South Korean electronics companies setting up plants in Noida

Dreamtech India Pvt Ltd and Starion India Pvt Ltd have bought 40 acres of land between them in Sector Ecotech 10 for setting up plants with invest-

ments worth 4.33 billion rupees that would generate jobs for over 3,500 youths. Five Korean manufacturers of smartphones and accessories have already bought about 87 acres of land in Greater Noida, promising to invest over 11.50 billion rupees and create job opportunities for over 8,700 youths.

India to call bids for 13GWh battery storage system in Ladakh

India will soon start calling out bids for setting up a 13 gigawatt-hours (GWh) grid-scale battery storage system in Ladakh. Touted as the largest global tender for a 13GWh grid-scale battery storage system, the plan includes setting up a 10GW of large green energy capacity in the region. The bid will include calls for wind as well as solar energy.

Companies exiting PLI scheme midway will have to refund incentives

DPIIT has said that if for any reason a company availing benefits under white goods PLI scheme fails to make full committed investment and exits midway, it will have to refund the incentives taken along with interest. In addition, the bank guarantee will also be invoked. Additionally, the department has now also included more LED components such as resistors, fusers, LED transformers, among others, in the target segments and eligible products.

Concession to Tesla a threat to India's Aatmanirbhar call?

The lobby representing the automotive industry is against any plan of providing concessions to the likes of Tesla. This lobby, citing the PM's call to Aatmanirbhar Bharat, noted that such concessions will only hamper the vision of the PM towards building a self-reliant India. The country, at the moment, levies 110% duty on importing electric vehicles that are priced above \$40,000.

Disappointment over refund rates under RoDTEP

The Indian Electrical & Electronics Manufacturers' Association (IEEMA)
