development of specialised service offerings.

The industry is gearing up for a range of possibilities across the target market segments and creating a viable business case for nano, micro, small, medium, and large UAVs by integrating data analytics and communication technologies. In the short to medium term, the competition will be concentrated on those UAV types that can be used in generalised applications, such as goods delivery by e-commerce companies, cinematography, surveillance and safety inspections, search and rescue, etc. The enterprises in the power and infrastructure sector are exploring the possibilities of using drones for asset management. Solar power plant operators, for example, can automate the monitoring of the construction activities and inspection of the solar farms by using AI-powered drones, capturing the thermal images along with the geospatial metadata.

Critical Components

- Standard Prop
- Pusher Prop
- Brushless Motor
- Motor Mount
- Landing Gear
- Boom
- Main Drone Body Part
- Electronic Speed
- Controllers (ESC)
- Flight Controller
- GPS Module
- Receiver
- Battery
- Battery Monitor
- Gimble
- Gimble Motor
- Gimble Controller Unit
- Camera
- Sensors
- Collision Avoidance Sensors
- Active Tracking Follow
- Mode and Safety Features

*BOM Reference No. Please refer page no. 18, table no G for the supplier details

Market Segmentation Overview

The public and private enterprises markets have already started witnessing adoption of drone technology and the same is expected to accelerate in coming years in the wake of growing dependency on data and logistical evolution

Target Customer Segment

- Logistics Services
- Disaster Response Forces
- Police Forces
- Rescue Teams of States
- Defense Forces
- Oil & Gas Companies (Refineries)
- Geospatial Companies
- Traffic Police
- Forest Services
- Land Border Management
- Coastguards
- Construction and Large Infrastructure Companies
- Film Production Companies
- Event and Wedding Planners
- Archeological Survey Department
- Parliament and Legislative Assembly Security Agencies
- Agriculture Services
- Metrological Department

Target Industry

- E-commerce
- Mobility and Transportation
- Healthcare
- Disaster Management
- Energy and Utilities
- Defense
- Agriculture
- Media and Entertainment
- Government Institutions
- Infrastructure/Public Sector
- Railway
- Mining
- Insurance
- Security Agencies
- Forest Management
