

Empowering India's

Parylene Coating Industry

The SCH-PPS Partnership

In the ever-evolving world of technology and manufacturing, the demand for innovative and reliable Parylene coating solutions has grown exponentially. Among the pioneers in this field, Plasma Parylene Systems GmbH (PPS) stands out as a leading global player. In 2002, they achieved a groundbreaking feat by introducing Parylene coating and Plasma adhesion in one unit for the first time worldwide, continuously pushing the boundaries of what's possible. Partnering with SCH, a renowned authority in the Parylene industry with over two decades of experience, has resulted in a powerful alliance that is transforming India's Parylene coating landscape.

The Fusion of Technologies:

PPS's breakthrough in 2002, combining Parylene coating and Plasma adhesion in one unit, marked a significant milestone in the industry. This exceptional combination of processes proved unmatched by any other competition in the world, setting new standards and demonstrating the possibilities of merging two essential technologies.

SCH: The India's and UK Parylene Experts:

With over 20 years of experience, SCH has been a key player in the industry, providing exceptional coating services, consulting, and comprehensive training programs. This wealth of expertise allowed them to forge a successful partnership with PPS, opening doors to new opportunities for their clients.

Seamless India Operations:

The collaboration between SCH and PPS has been fruitful since 2020. One of their major milestones includes the installation of India's largest 1000 liters Parylene coating machine, along with the country's first Hybrid, rotary, and conventional Parylene coating machines. This achievement has elevated India's position in the global coating market.

Comprehensive Support:

What truly sets SCH and PPS apart is their commitment to providing end-to-end solutions for their clients. Their all-in-one mentality ensures that customers receive seamless support throughout the project lifecycle. From initial ideation to final implementation, both companies work in tandem to offer technical expertise, process optimization, training, and local support. This holistic approach guarantees that clients can confidently navigate the complexities of the coating process.

Customized Solutions for Unique Requirements:

SCH's and PPS's partnership thrives on creativity and flexibility. Their extensive range of machinery and combined expertise allows them to develop tailor-made solutions to suit individual customer

requirements. Whether it's coating for medical devices, electronics, aerospace components, or other specialized applications, the collaboration between SCH and PPS ensures the highest quality and precision in every product.

Empowering India's Growing Markets:

The local support provided by SCH has been a significant advantage for clients exploring India's burgeoning markets. With their in-depth understanding of the region's specific needs and challenges, SCH has been able to seamlessly integrate Parylene coating services, facilitating smooth operations for clients and driving India's Parylene coating industry forward.

Conclusion:

The partnership between SCH and PPS represents a remarkable union of knowledge, innovation, and expertise in the world of Parylene and plasma technologies. Since introducing Parylene coating and Plasma adhesion in one unit for the first time worldwide, these industry leaders have elevated India's position in the global coating landscape. With their unwavering commitment to excellence and customer satisfaction, the SCH-PPS collaboration is poised to make significant strides in the years to come, leaving an indelible mark on the industry they serve.
