

Zhejiang NeoDen Technology Co., Ltd. has been manufacturing and exporting various small pick and place machines since 2010. Taking advantage of our own rich experienced R&D, and well-trained production, Neoden wins a great reputation from worldwide customers.

With a global presence in over 130 countries, the excellent performance, high accuracy, and reliability of NeoDen PNP machines make them perfect for RD, professional prototyping, and small to medium batch production. We provide professional solutions for one-stop SMT equipment.

In our global Ecosystem, we collaborate with our best partners to deliver a more closing sales service and highly professional and efficient technical support.

We believe that great people and partners make NeoDen a great company and that our commitment to Innovation, Diversity, and Sustainability ensures that SMT automation is accessible to every hobbyist everywhere.

Neoden YY1 is the Latest Generation of Low cost SMT mounter from, Neoden Technology

Neoden YY1 is a Low cost Desktop SMT Mounter with Two Nozzle and Three Auto Nozzle Changer Option. 103 Feeder Locations, Dual camera Vision System, High Accuracy Placement, Cut Tape/Reel component Pickup, Very User friendly GUI reduces Learning Curve of the Software for any users with even little knowledge in Programming Very well Suited for R&D institutes, Small Scale Production Units, Hobbyists Who are having Most of the components in the form of Cut Reel/Tape form. Decent 315x350+mm board area

Tool changing, which is an essential feature lacking in many low-end machines, 3 + 1 nozzles.

The machine default tape reel feeder setting are total 45pcs(8mm=36pcs, 12mm=6pcs, 16mm=3pcs), Above feeders support max 12mm height components.

a flying camera option for part vision, as this would improve speed considerably for relatively low cost

CMP PCB - Your Trusted PCB Partner

Old PCB Technology is now getting replaced by new technologies. Alongwith Rigid PCBs, Designers are now giving preference to Flexible PCBs, Rigid-Flex PCBs, HDI PCBs, Multilayer RF PCBs, Blind & Buried vias & higher layer counts.

We CMP PCB are the leading PCB manufacturer in PRC & supporting all types of PCB Technologies of Any Complexity & Any Qty. We produce PCBs from 1 layer to 36 Layers. We produce Rigid PCBs, Flexible PCBs, Flexi- Rigid PCBs, HDI PCBs, RF PCBs from 1 layer to 36 Layers.

PCB 8 Layer, Flex- Rigid, ENIG, Laser Depth Control

Why should you prefer us ?

1 - Our India Business Head has around 25 years experience in the PCB field & so he knows the pain of the Indian Customers.

- 2 - We are capable of being your one stop PCB Source.
- 3 - We support Protos, Trial Qtys & Serial Production Qty
- 4 - We respond Quickly.
- 5 - Quotations less than 24 hours & Proto production less than one week
- 6 - Mass production in 1 to 2 weeks time.

PCB 12 Layer, HDI, BGA, ENIG

For your PCB requirements, Please do contact us:
