Enhanced Integrated PTC for Next Generation User Interfaces

Driven Shield Plus and Functional Safety for Best-in-Class Water Tolerance and Reliable Operation

The automotive industry is constantly looking for ways to improve the user experience for drivers and passengers, including high expectations for touch interfaces to work well in moisture and noise, while requiring Functional Safety features. Touch controls provide a more intuitive and modern way of interacting with a vehicle, making it easier to access information and control various functions. With enhanced Peripheral Touch Control (PTC) technology, the touch controls are even more responsive and accurate, providing a smoother and more enjoyable user experience.

Our PIC32CM JH MCU family features integrated PTC that provides moisture tolerant, noise immune, highly responsive and accurate touch for next generation user interfaces. Additionally, the FuSa features that come with this family can be used to implement ISO 26262, IEC 61508 and IEC 60730 applications.

Key Features

- Driven Shield Plus for industry-leading moisture tolerance
- 5V for high noise immunity
- AUTOSAR ASIL B MCAL support
- Enables surfaces/trackpads, buttons, sliders and wheels
